# 1 BACKGROUND

---

This *National Incident-Based Reporting System (NIBRS) Technical Specification* has been developed in accordance with the Federal Bureau of Investigation's (FBI's) UCR Program. The UCR system will support the FBI's ability to collect, analyze, and report on national crime statistics.

The UCR system includes functionality to process NIBRS data submitted in Extensible Markup Language (XML) format. However, to minimize impacts on law enforcement agencies (LEAs) that participate in the FBI's UCR Program, the UCR system will continue to accept data submissions in the legacy NIBRS flat-file formats. This specification captures the requirements for the legacy NIBRS position-based flat-file format in alignment with technical aspects and documentation identified below:

- *NIBRS Volume 1: Data Collection Guidelines*, August 2000
- *NIBRS Volume 2: Data Submission Specifications*, November 2001
- *NIBRS Volume 4: Error Message Manual*, December 1999
- *NIBRS Addendum for Submitting Cargo Theft Data*, January 2010
- *NIBRS Addendum for Submitting Law Enforcement Officers Killed and Assaulted (LEOKA) Data*, October 2002
- *NIBRS Addendum for Submitting Additional Location and Property Data Values*, March 2010
- *UCR State Program Bulletins*, 1999–2013
- *UCR Program Quarterly* 2014–present

The new UCR system will be able to accept data that is more than two years old, thus eliminating the need for window submissions. If you are upgrading or modifying your Records Management System (RMS), do not code for Windows Submissions. The system will still accept Window Submissions; however, the optimal way to submit is to delete the old incident first then add the new incident with all of the updated information. Some of the information captured in the documents referenced above has not been included in this specification since it pertains to policy and user training and not to the technical implementation of a NIBRS system. This policy and training-related information will be included in the *NIBRS User Manual*.

Virginia requires additional specifications specific to the Commonwealth. Those may be found in each data element. Virginia specific information (including Data Elements & Data Values) is highlighted.

## 2 INCIDENT REPORTS

---

Agencies submit Incident Reports to the FBI using up to eight distinct records, each of which is referred to as a “segment.” The 58 numbered data elements and 11 structural data elements comprising the NIBRS data structure have been grouped into these segment levels and are referred to as Levels 0–7. These segments are the mechanism by which agencies report NIBRS data to the FBI.

The segment levels are as follows:

- Level 1–Administrative Segment
- Level 2–Offense Segment
- Level 3–Property Segment
- Level 4–Victim Segment
- Level 5–Offender Segment
- Level 6–Arrestee Segment
- Level 7–Group B Arrest Report Segment
- Level 0–Zero Report Segment

An incident report may consist of many possible combinations of circumstances ranging from one simple offense, victim, and offender situation to a complex set of multiple offenses, property loss, victims, offenders, and arrestees. Additionally, each of the victims may not be involved in each of the offenses. In other words, one, some, or all of the victims may be connected to each applicable offense.

There are two categories of offenses reported in the NIBRS: Group A and Group B. It is important to determine which category an offense belongs to because the reporting requirements for Group A and Group B reports are different. Group A offenses must include relevant incident data represented in multiple segments (Administrative, Offense, Property, Victim, Offender, and Arrestee); Group B offenses include only arrest data. 6.10Appendix A: Offense Codes provides a listing of the offenses that fall under Group A or Group B.

Agencies should submit Incident Reports for all incidents committed within an agency’s jurisdiction.

### 2.1 Header Data Elements

Header data elements indicate the type of data in a submission. They appear at the beginning of each segment level to identify the segment and indicate the processing action required, as well as to connect all of an agency’s data to a particular submission. These header data elements are:

- Segment Length
- Segment Level
- Segment Action Type
- Month of Submission
- Year of Submission

Segment Length-Positions 1 through 4 contains the Record Descriptor Word (RDW) which is the binary length of each segment. Each segment has variable lengths depending upon the segment.

The RDW is the length of the actual data set plus the beginning RDW. References to each Segment Layout Section are:

[Administrative Segment Layout \(Level 1\)](#)

[Offense Segment Layout \(Level 2\)](#)

[Property Segment Layout \(Level 3\)](#)

[Victim Segment Layout \(Level 4\)](#)

[Offender Segment Layout \(Level 5\)](#)

[Arrestee Segment Layout \(Level 6\)](#)

Segment Level-Position 5 of each record (segment) will identify the segment level being submitted.

Segment Action Type-Position 6 of each record (segment) will identify the action type being submitted.

## **2.2 Group A Incident Reports**

At a minimum, each Group A Incident Report will contain four (4) of the six (6) segment levels (Administrative, Offense, Property, Victim, Offender, and Arrestee). Depending on circumstance and rules contained within this document, a report may contain multiple segment levels of the same type. Within each segment level, level specific data elements must be provided in the report. The segment levels are described below.

## 2.2.1 Level 1–Administrative Segment

The Administrative Segment is the master segment. Only one Administrative Segment will be accepted per Group A Incident Report. The Data Edit (Error 075) requires that each incident report contain Segments 1, 2, 4, and 5. All other incident data relating to offenses, property, victims, offenders, and arrestees are contained in the other segments that are linked to the Administrative Segment by Data Element 1 (ORI) and Data Element 2 (Incident Number).

The data elements used in the Administrative Segment are:

Data Element 1-ORI

Data Element 2-Incident Number

Data Element 2A-Cargo Theft

Data Element 3-Incident Date

Data Element 3-Report Date Indicator

- Only required if incident date is unknown, otherwise Report Date Indicator should be blank

## 2.4 Level 0–Zero Report Segment

The Zero Report Segment is used when no criminal activity occurred in a law enforcement agency's (LEA's) jurisdiction for the reporting month.

**Note:** A UCR program should not automatically generate the Zero Report Segment for a local LEA that does not submit crime data for a particular month. A UCR program should **only** submit the Zero Report Segment for a local LEA that communicates the fact that no criminal activity (offense, arrest, or recovered property) occurred in its jurisdiction for the reporting period.

The absence of crime data does not mean that no crimes occurred. NIBRS must differentiate between (1) a zero report—no crime occurred and (2) no crime information is being submitted. The presence or absence of this record in conjunction with other available data will provide the FBI with useful statistical information.

Refer to Section 4.7, Zero Reporting, for additional information pertaining to the handling of zero reporting information. The data elements for this segment are:

1. Data Element 1-ORI
2. Data Element 2-Incident Number

**Note:** Must be all zeros in a zero report segment.

- Zero Report Month, while not a data element, it is required information for the Zero Report Segment
- Zero Report Year
- Zero Report Year, while not a data element, it is required information for the Zero Report Segment

## 3 DATA ELEMENT DEFINITIONS

---

The data elements and data values identified in this section represent those required for participating in the FBI's UCR Program via NIBRS. LEAs should use these data elements and data values to report incidents and arrests involving Group A offenses, reporting arrests involving Group B offenses, and Zero Reports.

The FBI encourages participating agencies to include additional data elements and values in their own Incident-Based Reporting (IBR) systems to satisfy their own informational needs. However, agencies should report to the FBI only those data elements and data values that are listed in this section.

### 3.1 Data Elements

LEAs must use a series of established data elements, i.e., data fields, within each segment of the Group A Incident Report and in the Group B Arrest Report to describe the details of each component of a crime. Examples of these details include Data Element 2 (Incident Number), Data Element 6 (UCR Offense Code), and Data Element 25 (Type of Victim).

### 3.2 Data Values

For each data element, reporting agencies should choose the most appropriate data value(s), i.e., specific characteristics or types of the field being reported that have assigned codes. Although some data values require a specific format, most are codes from an approved list, each followed by an equal sign ( = ) and a description of the data value.

For example, for Data Element 3 (Incident Date), the specific format for the data value is YYYYMMDD. For Data Element 27 (Sex of Victim), agencies may enter one of the codes M = Male, F = Female, or U = Unknown to describe the gender of the victim; but for Data Element 48 (Sex of Arrestee), agencies may enter only M = Male or F = Female to describe the gender of the arrestee.

### 3.3 Data Element Descriptions

The data elements identified in the subsequent sections are grouped by the type of data they represent, e.g., administrative data, offense data, arrestee data. Some data elements overlap and are present throughout the various segments.

The format and definition of the attributes of the data elements are:

**Group:** This identifies whether a data element is used in *only* the Group A Incident Report or both the Group A Incident Report and the Group B Arrest Report. A = Group A; B = Group B.

**Format:** This identifies the number of characters allowed for the data element in the segment and whether the characters must be numeric, alphabetic, or alphanumeric.

**Position:** This identifies the physical position on the segment where the data element occurs. For example, Positions 56–57 indicates the data must be written beginning in the 56th position and ending in the 57th position in the segment.

**Occurrence:** This identifies how many times the data element occurs in a segment or incident.

**Mandatory:** Some data elements are required in order to have a complete/valid data submission, i.e., they are *mandatory*. Others are *conditional* based on the data values submitted for other data elements. Data elements that are reported at the discretion of the agency submitting the incident are considered *optional*.

**Edits:** This identifies specific conditions that must be met in order for the data element to be completed. The table includes a description of the edit as well as the associated error number. A numerical listing of Error Numbers with the associated Error Message and Error Description are located in Section 5: Errors.

**Data Values:** This identifies the specific data values that are allowed in completing the data element.

### 3.3.1 Header Data Elements

Header data elements describe the type of data in a submission. They appear at the beginning of each segment level to identify the segment and indicate the processing action required, as well as to connect all of an agency's data to a particular submission.

#### 3.3.1.1 Segment Length

Segment length is used to indicate the number of characters submitted in the segment. It should be noted that the segment lengths are different depending on the number and type of data elements and corresponding values that are required.

**Group:** A, B  
**Format:** 4-Character Numeric  
**Position:** 1–4  
**Occurrence:** Once per Segment  
**Mandatory:** Yes

**Mandatory:** Yes

The referenced data element in an incident must contain data when the referenced data element is mandatory or when the conditions are met for data that must be entered into a conditionally mandatory field.	001, 101, 201,301, 401, 501,601, 701
The ORI already exists in the reference table for a different agency. Verify that the ORI is accurate.	931
The ORI submitted was not found in the reference data table. Verification is needed to ensure that the submitting agency is providing an accurate ORI for the data submission.	932
The ORI submitted is currently in a covered by status. Verification is needed to ensure that the information being provided is accurate and/or to ensure that the submitting agency is now providing its own information and is no longer in covered by status.	933
The ORI submitted is in delete status. Verification is needed to ensure this is accurate.	934
Segment Levels in a Group A Incident Report must be organized in numerical order. For example, an incident having segments 1, 2, 2, 3, 4, 4, 4, 5 must be written in that order, not as 1, 2, 2, 5, 3, 4, 4, 4.	050
Segment Level must contain a valid data value 0–7.	051
Segment Level 1 (Administrative Segment) with Segment Action Type I = Incident Report must be the first segment submitted for each Group A Incident Report.	055
Segment Level 2 (Offense Segment) must have at least one Segment Level 4 (Victim Segment) connected to it by entering the offense code identified in Data Element 6 (UCR Offense Code) in Data Element 24 (Victim Connected to UCR Offense Code).	065
Data Element 34 (Offender Numbers To Be Related) has a value that does not have a corresponding Offender Segment. For example, if the field value shown in Data Element 34 is 15, an Offender Segment does not exist with a value of 15 in Data Element 36 (Offender Sequence Number).	070

Edit Description	Associated Error Code
Segment Level 6 (Arrestee Segment) with Segment Action Type I = Incident Report cannot be submitted with Data Element 42 (Arrest Date) containing an arrest date on or earlier than the date entered in Data Element 5 (Exceptional Clearance Date) when Data Element 4 (Cleared Exceptionally) contains a data value other than N = Not Applicable (indicating the incident is cleared exceptionally).	071
<p>Segment Level 3 (Property Segment) must be submitted with Data Element 14 (Type Property Loss/Etc.) as 7 = Stolen/Etc. before it can be submitted as 5 = Recovered for the <i>same property</i> in Data Element 15 (Property Description). Any property being reported as recovered must first be reported as stolen. Exceptions to this rule are:</p> <p>1) When Data Element 6 (UCR Offense Code) contains an offense that allows property to be recovered without first being stolen in that same incident (i.e., 250 = Counterfeiting/Forgery and 280 = Stolen Property Offenses, ).</p> <p>2) When a vehicle was stolen and the recovered property in Data Element 15 (Property Description) is 38 = Vehicle Parts/ Accessories.</p>	072
Segment Level 3 (Property Segment) with Segment Action Type I = Incident Report must contain a data value in Data Element 18 (Number of Stolen Motor Vehicles) greater than or equal to the data value entered in Data Element 19 (Number of Recovered Motor Vehicles) within the same incident.	073
Segment Level 3 (Property Segment) with Segment Action Type I = Incident Report must be submitted when Data Element 6 (UCR Offense Code) contains an offense of Crimes Against Property, 100 = Kidnapping/Abduction, 35A = Drug/Narcotic Offenses, or Gambling Offenses.	074
Segment Levels 1, 2, 4, and 5 (Administrative Segment, Offense Segment, Victim Segment, and Offender Segment) with Segment Action Type I = Incident Report must be submitted for each Group A Incident Report; they are mandatory.	075
Segment Level 3 (Property Segment) with Segment Action Type I = Incident Report cannot be submitted unless Data Element 6 (UCR Offense Code) contains an offense of Crimes Against Property, 100 = Kidnapping/Abduction, 35A = Drug/Narcotic Offenses, , , , Commerce Violations*, or Gambling Offenses.	076

Segment Level Edit Descriptions	
Edit Description	Associated Error Code
<p>The Group A Incident Report submission contains only offense(s) that are Crimes Against Society. When this is so, Data Element 25 (Type of Victim) must be S = Society/Public, and only one victim may be submitted. Exception - Type of Victim must be G = Government for offenses:</p> <p>* *</p>	080
<p>Segment Level 4 (Victim Segment) with a data value in Data Element 24 (Victim Connected to UCR Offense Code) of a Crime Against Person or Robbery must contain at least two offender sequence numbers in Data Element 34 (Offender Number to be Related) when there are two or more Segment Level 5 (Offender Segment) records submitted for the incident, and Data Element 25 (Type of Victim) is I = Individual or L = Law Enforcement Officer.</p>	085
<p>Segment Level 6 (Arrestee Segment) and Segment Level 7 (Group B Arrest Report Segment) cannot have the same data values entered in Data Element 2 (Incident Number) and Data Element 41 (Arrest Transaction Number), respectively, for the same ORI.</p>	088
<p>Segment Length for the Administrative Segment (Level 1) must be 87 characters (not reporting Cargo Theft) or 88 characters (reporting Cargo Theft). Once an agency begins participation in reporting Cargo Theft, indicated by 0088 in the Record Descriptor Word (RDW), then all future Administrative Segments within that ORI must be formatted using 0088.</p> <p><b>Note:</b> The only exception would be that data prior to the agency starting to report Cargo Theft could be submitted with the original 0087 RDW.</p>	178
<p>(Offense Segment) When a Group A Incident Report is submitted, the individual segments comprising the Incident cannot contain duplicates. In this case, two Offense Segments were submitted having the same offense in Data Element 6 (UCR Offense Code).</p>	262
<p>(Offense Segment) May be submitted only 10 times for each Group A Incident Report; 10 offense codes are allowed for each incident.</p>	263
<p>Segment Length for the Offense Segment (Level 2) must be 63 characters (reporting only Bias Motivation #1) or 71 characters (reporting Bias Motivations #2–#5). Once an agency begins participation in reporting Bias Motivations #2–#5, indicated by 0071 in the RDW, then all future Offense Segments within that ORI must be formatted using 0071.</p> <p><b>Note:</b> The only exception would be that data prior to the agency starting to report Bias Motivations #2–#5 could be submitted with the original 0063 RDW.</p>	284

Segment Level Edit Descriptions	
Edit Description	Associated Error Code
(Property Segment) When a Group A Incident Report is submitted, the individual segments comprising the Incident cannot contain duplicates. Example, two property segments cannot be submitted having the same entry in Data Element 14 (Type Property Loss/Etc.).	376
(Property Segment) Cannot be submitted with 10 = Drugs/Narcotics in Data Element 15 (Property Description) and blanks in Data Element 16 (Value of Property) unless Data Element 6 (UCR Offense Code) is 35A = Drug/ Narcotic Violations.	382
(Victim Segment) When a Group A Incident Report is submitted, the individual segments comprising the Incident cannot contain duplicates. In this case, two victim segments were submitted having the same entry in Data Element 23 (Victim Sequence Number).	451
(Victim Segment) Each UCR Offense Code entered into Data Element 24 (Victim Connected to UCR Offense Codes) must have the Offense Segment for the value. In this case, the victim was connected to offenses that were not submitted as Offense Segments. A victim cannot be connected to an offense when the offense itself is not present.	466
(Victim Segment) Data Element 35 (Relationship of Victim to Offender) has a relationship of VO = Victim Was Offender. When this code is entered, a minimum of two victim and two offender segments must be submitted. In this case, only one victim and/or one offender segment was submitted. The entry of VO on one or more of the victims indicates situations such as brawls and domestic disputes. In the vast majority of cases, each victim is also the offender; therefore, every victim record would contain a VO code.	470
(Victim Segment) Cannot be submitted multiple times with VO = Victim Was Offender in Data Element 35 (Relationship of Victim to Offender) when Data Element 34 (Offender Number to be Related) contains the same data value (indicating the same offender).	474
(Victim Segment) An offender can only have one spousal relationship. In this instance, two or more victims have a relationship of SE = Spouse to the same offender.	476
Data Element 31 (Aggravated Assault/Homicide Circumstances) has 08 = Other Felony Involved but the incident has only one offense. For this code to be used there must be an Other Felony. Either multiple entries for Data Element 6 (UCR Offense Code) should have been submitted, or multiple individual victims should have been submitted for the incident report.	480
Segment Length for the Victim Segment (Level 4) must be 129 characters (not reporting LEOKA) or 141 characters (reporting LEOKA). Once an agency begins participation in reporting the LEOKA via NIBRS data elements 25A/25B/25C, indicated by 0141 in the RDW, then all future Victim Segments within that ORI must be formatted using 0141.  <b>Note:</b> The only exception would be that data prior to the agency starting to report LEOKA via the NIBRS data elements, could be submitted with the original 0129 RDW.	484

Segment Level Edit Descriptions	
Edit Description	Associated Error Code
(Offender Segment) When a Group A Incident Report is submitted, the individual segments comprising the incident cannot contain duplicates. In this case, two Offender Segments were submitted having the same entry in Data Element 36 (Offender Sequence Number).	551
(Offender Segment) When multiple Offender Segments are submitted, none can contain a 00 = Unknown value because the presence of 00 indicates that the number of offenders is unknown. In this case, multiple offenders were submitted, but one of the segments contains the 00 = Unknown value.	555
(Offender Segment) None of the Offender Segments contain all known values for Age, Sex, and Race. When an incident is cleared exceptionally (Data Element 4 contains an A through E), one offender must have all known values.	558
(Offender Segment) The incident was submitted with Data Element 6 (UCR Offense Code) value of 09C = Justifiable Homicide or , but unknown information was submitted for all the offender(s). At least one of the offenders must have known information for age, sex, and race.	559
<p>Segment Length for the Offender Segment (Level 5) must be 45 characters (not reporting Offender Ethnicity) or 46 characters (reporting Offender Ethnicity). Once an agency begins participation in reporting the Offender Ethnicity, indicated by 0046 in the RDW, then all future Offender Segments within that ORI must be formatted using 0046.</p> <p><b>Note:</b> The only exception would be that data prior to the agency starting to report Offender Ethnicity could be submitted with the original 0045 RDW.</p>	584
<p>(Arrestee Segment) A Group A Incident Report was submitted with more arrestees than offenders. The number (nn) of offenders is shown within the message. The incident must be resubmitted with additional Offender Segments. This message will also occur if an arrestee was submitted and Data Element 36 (Offender Sequence Number) was 00 = Unknown.</p> <p>An exception is when an additional arrest is reported for a pre-NIBRS incident. In this case, Segment Level 6 (Arrestee Segment) will contain A = Add, but the data value in Data Element 2 (Incident Number) will not match an incident already on file in the national UCR database. The segment will be processed, but used only for SRS purposes and will not be included in the agency's NIBRS figures.</p>	656
(Arrestee Segment) Segment Level 6 (Arrestee Segment) cannot contain duplicate data values in Data Element 40 (Arrestee Sequence Number) when two or more Arrestee Segments are submitted for the same incident. The Data Element 41 (Arrest Transaction Number) is the number assigned by the reporting agency to an arrest report to identify it uniquely. If multiple arrestees are reported, each having the same data value in Data Element 40 (Arrestee Sequence Number), ensure that Data Element 41 (Arrest Transaction Number) is unique for each arrestee submitted to ensure that duplication does not occur.	661

Edit Description	Associated Error Code
(Arrestee Segment) Group A Incident Reports cannot have arrests when Data Element 6 (UCR Offense Code) is 09C = Justifiable Homicide. By definition, a justifiable homicide never involves an arrest of the offender (the person who committed the justifiable homicide).	669
<p>(Group B Arrest Report Segment) When a Group B Arrest Report (Level 7) has two or more arrestees, the individual segments comprising the report cannot contain duplicates. In this case, two arrestee segments were submitted having the same entry in Data Element 40 (Arrestee Sequence Number). Error should only be thrown when the action type is A = Add.</p> <p>The Data Element 41 (Arrest Transaction Number) is the number assigned by the reporting agency to an arrest report to identify it uniquely. If multiple arrestees are reported, each having the same data value in Data Element 40 (Arrestee Sequence Number), ensure that Data Element 41 (Arrest Transaction Number) is unique for each arrestee submitted to ensure that duplication does not occur.</p>	751
(Group B Arrest Report Segment) The Group B Arrest Report (Level 7) submitted as an A = Add is currently active in the FBI's database; therefore, it was rejected. If multiple arrestees are involved in the incident, ensure that Data Element 40 (Arrestee Sequence Number) is unique for each Arrestee Segment submitted so that duplication does not occur.	759

7 = Level 7 (Group B Arrest Report Segment)

### 3.3.1.3 Segment Action Type

Segment Action Type determines the kind of database activity that is to be performed. See Section 4.6: Segment Action Types for definitions of the Segment Action Type data values.

#### 3.3.1.4 Month of Submission

**Direct to FBI:** Month of Submission is defined as the month the submission is created. Each segment in a submission must have the same Month of Submission and Year of Submission.

**Submitted to Virginia:** Month of Submission is defined as the month of data due per Virginia requirements. Data is due on or before the 15th after the close of each month. (Ex. The file created for January is due 2/15 and the month of submission should be 01 to indicate the file is to submit data collected in January.)

Each segment in a submission must have the same Month of Submission and Year of Submission.

**Group:** A, B

Month of Submission and Year of Submission must contain the same data values for each segment in a NIBRS submission. The first segment processed will be compared with all other segments to check for this condition.	058
Month of Submission and Year of Submission cannot be after the date the FBI receives and processes a NIBRS submission. This edit checks for data submitted for a future month/year.	060

### 3.3.1.5 Year of Submission

Year of Submission is the year in which the Month of Submission occurs. Each segment in a submission must have the same Month of Submission and Year of Submission.

**Submitted to Virginia:** Year of Submission is the year in which the Month of Submission is defined as the month of data due per Virginia requirements. Data is due on or before the 15th after the close of each month.

### 3.3.1.6 City Indicator

The FBI assigns a City Indicator code to cities that submit directly to the FBI because their UCR program does not participate in NIBRS.

**Data Values:** The FBI's UCR Program assigns Data Values on an individual agency basis. For example, GAA7 = Anytown, GA.

### 3.3.2 Administrative Segment

The Administrative Segment is the master segment and contains identifying data information for organizational purposes that are applicable to the entire incident report (e.g., the unique case number assigned to the incident and the date and hour that the incident occurred). A single Administrative Segment should be submitted for each incident report.

#### 3.3.2.1 Data Element 1-ORI

ORI is a unique nine-character National Crime Information Center (NCIC) Originating Agency Identifier (ORI) that has been assigned to each LEA. The NCIC assigns all ORI numbers to any agency that is going to be participating in Uniform Crime Reporting. This ORI might not be the same as the ORI assigned to the same agency for NCIC reporting. Please work with the Crime Statistics Management Unit (CSMU) Statistical Assistant to address ORI discrepancies.

**Note:** Although the details regarding ORI are provided only once here, this data element must be included in each segment of the Group A Incident Report, in addition to the Group B Arrest Report Segment and Zero Report Segment. The edits and associated errors listed include edits and errors for each segment to which the information applies.

**Group:** A, B

**Format:** 9-Character Alphanumeric

Data Element 1	(ORI) Must be a valid nine-character NCIC ORI.	952, 931-934
Data Element 1	(ORI) First two positions must be the code of the state (e.g., SC, MD) in which the incident occurred. For nonfederal participants, every record must have the same code.	059

**Data Values:** Valid ORI values are assigned by the NCIC and contain the characters A–Z (capital letters only) and 0–9.

### 3.3.2.3 Data Element 2-Incident Number

Incident Number is the number assigned by the reporting agency to each Group A Incident Report to uniquely identify the incident (e.g., the LEA's Case Number). Incident Number can be up to 12 characters long.

**Note:** Although the details regarding Incident Number are provided only once here, this data element must be included in each segment of the Group A Incident Report, in addition to the Zero Report Segment. Incident Number is not used in the Group B Arrest Report Segment, where it is replaced by Data Element 41 (Arrest Transaction Number). The edits and associated errors listed include edits and errors for each segment to which the information applies.

As stated below in the table, see Associated Error Code 056, No incident numbers should ever repeat even if the year in which the incident number is generated is different. A simple fix is to append the year to the end of the incident number so that you will always have unique incident numbers every year. NIBRS allots for 12 characters to be used for the incident number; this allows an agency to have or store more than 999 billion unique incidents.

Data Element 2	(Incident Number) For each submitting agency, as identified in Section 3.3.2.1, the value must be a unique number. This means that no two incidents can have the same incident number. Some agencies ensure uniqueness by prefixing every incident number with a two-digit year followed by a number starting with 1, while others just increment the number by 1 for each new incident.	056
Data Element 2	A Group A Incident Number and a Group B Arrest Report Arrest Transaction Number cannot have the same number within the same ORI.	088
Data Element 2	(Incident Number) Zero-Reporting Segment (Level 0) must contain 12 zeros as the Incident Number.	092
Data Element 2	(Incident Number) Must be blank right-fill if under 12 characters in length. Cannot have embedded blanks between the first and last characters entered.	115, 215, 315, 415, 515, 615
Data Element 2	(Incident Number) Must be left-justified with blank right-fill if under 12 characters in length.	116, 216, 316, 416, 516, 616

### Group B Arrest Report Segment (Level 7)

Data Element 2 (Incident Number) is not used in the Group B Arrest Report. Data Element 41 (Arrest Transaction Number) is used in its place. See Section 3.3.7, Arrestee Segment/Group B Arrest Report Segment, Arrest Transaction Number, for more information.

### Zero Report Segment (Level 0)

Data Element 2 (Incident Number) is not used in the Zero Report Segment. Record Positions 26–37 should default to all zeros.

### 3.3.2.4 Data Element 2A-Cargo Theft

This data element indicates whether or not the incident involved a Cargo Theft. Although it is an optional data element, once added to a submission, it becomes conditional and must be populated with a valid data value or left blank depending on the offenses in the incident. By incorporating the Segment Length of “0088” for Cargo Theft, incidents with a Cargo Theft-related offense must contain a valid data value in record position 88. Conversely, any incident without one of these offenses must contain a blank in position 88. Cargo Theft-related offenses are:

- 120 = Robbery
- 210 = Extortion/Blackmail
- 220 = Burglary/Breaking & Entering
- 23D = Theft From Building
- 23F = Theft From Motor Vehicle
- 23H = All Other Larceny
- 240 = Motor Vehicle Theft
- 26A = False Pretenses/Swindle/Confidence Game
- 26B = Credit Card/Automated Teller Machine Fraud
- 26C = Impersonation
- 26E = Wire Fraud
- 26F = Identity Theft
- 26G = Hacking/Computer Invasion
- 510 = Bribery
- 270 = Embezzlement

### 3.3.2.5 Data Element 3-Incident Date

Incident Date is used to enter the year, month, and day (YYYYMMDD) when the incident occurred or the beginning of the time-period in which it occurred, as appropriate.

**Note:** When the date of the incident is unknown, then enter the date the incident was reported and enter R = Report Date in Report Date Indicator (Record Position 46).

Data Element 3	(Incident Date) The data element in error contains a date that is not entered correctly. Each component of the date must be valid; that is, months must be 01 through 12, days must be 01 through 31, and year must include the century (i.e., 19xx, 20xx). In addition, days cannot exceed maximum for the month (e.g., June cannot have 31 days). Also, the date cannot exceed the current date.	105
Data Element 3	(Incident Date) The UCR Program has determined that an ORI will no longer be submitting data to the FBI as of an inactive date. The UCR Program will not accept data from the ORI after this date.	118
Data Element 3	(Incident Date) The date cannot be later than the year and month the electronic submission represents. For example, the May 1999 electronic submission cannot contain incidents happening after this date.	170
Data Element 3	(Incident Date) cannot be earlier than 01/01/1991. This edit will preclude dates that are obviously incorrect since the FBI began accepting NIBRS data on this date.	172
Data Element 3	A Group "A" Incident Report was submitted with Data Element 3 (Incident Date/Hour) containing a date that occurred before the agency converted over to NIBRS.	173

Data Element 3	(Incident Date) is missing for a Group A Incident Report with a Segment Action Type of D = Delete; must be populated with a valid data value and cannot be blank. Incident Number matches multiple Group A Incident Reports.	199

**Data Values:** Data Element 3 (Incident Date) must be a valid date in YYYYMMDD format:

Year (YYYY): 1991–Current

Month (MM): 01 = January

02 = February

03 = March

04 = April

05 = May

06 = June

07 = July

08 = August

09 = September

10 = October

11 = November

12 = December

Day of the Month (DD): 01–31 (depending on the month).

### 3.3.2.6 Data Element 3-Report Date Indicator

Report Date Indicator is used to designate that the date entered in Data Element 3 (Incident Date) is the Report Date rather than the Incident Date.

**Group:** A

**Format:** 1-Character Alphabetic

**Position:** 46

**Occurrence:** Once per Administrative Segment

**Mandatory:** Conditional

**Data Values:** R = Report Date

### 3.3.2.7 Data Element 3-Incident Hour

Incident Hour is used to enter the hour when the incident occurred or the beginning of the time period in which it occurred, as appropriate.

**Group:** A  
**Format:** 2-Character Numeric (HH)  
**Position:** 47–48  
**Occurrence:** Once per Administrative Segment

If 00 = Midnight is entered, be careful that the Incident Date is entered as if the time was 1 minute past midnight. <b>Note:</b> When an incident occurs exactly at midnight, Data Element 3 (Incident Date) would be entered as if the time is 1 minute past midnight. For example, when a crime occurred exactly at midnight on Thursday, Friday's date would be entered.	152
Data Element 3	(Incident Hour) For Offenses of 09A, 13A, 13B and 13C ONLY - When Data Element 25 (Type of Victim) is L = Law Enforcement Officer then Data Element 3 (Incident Date/Hour) must be populated with a valid hour (00-23). Incident Hour Unknown (Blank) is not a valid entry.	106

**Data Values:** 00–23

### 3.3.2.8 Data Element 4-Cleared Exceptionally

Cleared Exceptionally is used to indicate whether or not the incident is cleared by exceptional means. In a multiple-offense incident, the exceptional clearance of one offense clears the entire incident. An incident cannot be cleared exceptionally if it was previously or concurrently cleared by an arrest, i.e., if an Arrestee Segment (Level 6) is submitted.

**Group:** A  
**Format:** 1-Character Alphabetic  
**Position:** 49  
**Occurrence:** Once per Administrative Segment

Data Element 4	Segment Level 6 (Arrestee Segment) with Segment Action Type I = Incident Report cannot be submitted with Data Element 42 (Arrest Date) containing an arrest date on or earlier than the date entered in Data Element 5 (Exceptional Clearance Date) when Data Element 4 (Cleared Exceptionally) contains a data value other than N = Not Applicable (indicating the incident is cleared exceptionally).	071
Data Element 4	(Cleared Exceptionally) The referenced data element in an incident must contain data when the referenced data element is mandatory or when the conditions are met for data that must be entered into a conditionally mandatory field.	101
Data Element 4	(Cleared Exceptionally) The referenced data element must contain a valid data value when it is entered; blank is permissible on nonmandatory fields.	104
Data Element 4	(Cleared Exceptionally) Cannot be N = Not Applicable if Data Element 5 (Exceptional Clearance Date) is entered.	153

**Data Values:** A = Death of Offender  
B = Prosecution Declined (by the prosecutor for a reason other than lack of probable cause)  
C = In Custody of Other Jurisdiction (includes extradition denied)  
D = Victim Refused to Cooperate (in the prosecution)  
E = Juvenile/No Custody (the handling of a juvenile without taking him/her into custody, but rather by oral or written notice given to the parents or legal guardian in a case involving a minor offense, such as petty larceny).  
N = Not Applicable (not cleared exceptionally).

### 3.3.2.9 Data Element 5-Exceptional Clearance Date

Exceptional Clearance Date is used to enter the date the incident is cleared by exceptional means (i.e., a code other than N = Not Applicable is entered in Data Element 4 (Cleared Exceptionally)).

**Group:** A  
**Format:** 8-Character Numeric (YYYYMMDD)  
**Position:** 50–57  
**Occurrence:** Once per Administrative Segment  
**Mandatory:** Conditional

This data element is mandatory when Data Element 4 (Cleared Exceptionally) contains data values A–E (the incident is cleared by exceptional means).

In addition, days cannot exceed maximum for the month (e.g., June cannot have 31 days). The date cannot be later than that entered within the Month of Electronic submission and Year of Electronic submission fields on the data record. For example, if Month of Electronic submission and Year of Electronic submission are 06/1999, the recovered date cannot contain any date 07/01/1999 or later. Also, the date cannot exceed the current date.	105
Data Element 5	(Exceptional Clearance Date) is earlier than Data Element 3 (Incident Date/Hour).	155
Data Element 5	(Exceptional Clearance Date) must be present if the case was cleared exceptionally. Data Element 4 (Cleared Exceptionally) has an entry of A through E; therefore, the date must also be entered.	156
Data Element 5	(Exceptional Clearance Date) cannot contain a date earlier than the date the LEA began submitting data via NIBRS.	173

**Data Values:** Data Element 5 (Exceptional Clearance Date) must be a valid date in YYYYMMDD format:

Year (YYYY): 1991–Current

Month (MM): 01 = January

02 = February

03 = March

04 = April

05 = May

06 = June

07 = July

08 = August

09 = September

10 = October

11 = November

12 = December

Day of the Month (DD): 01–31 (depending on the month).

**Data Values:** Refer to Appendix A–Group A Offenses

### 3.3.3 Offense Segment

The Offense Segment describes the various types of offenses involved in the incident and is submitted for up to ten of the most serious Group A offenses in the incident (as determined by the reporting agency). Only one Offense Segment should be submitted for each reported UCR Offense Code (Data Element 6) even though there may have been more than one victim of the crime. At least one Offense Segment must be submitted for each Group A Incident Report.

Each offense must be reported if it is a separate, distinct crime, rather than just a part of another offense. For example, every robbery includes some type of assault; but because the assault is an element that makes up the crime of Robbery, only Robbery should be reported. On the other hand, if during a robbery the victim is forced to engage in sexual relations, both Robbery and a Sex Offense should be reported, because sexual intercourse without the consent of the victim is not an element of Robbery.

**Note:** In addition to the data elements specified, the Offense Segment also contains the Header Data Elements identified in Section 3.3.1, as well as Data Element 1 (ORI) and Data Element 2 (Incident Number) included in the Administrative Segment, Section 3.3.2.

#### 3.3.3.1 Data Element 6-UCR Offense Code

UCR Offense Code is used to enter the data values of the Group A offenses that occurred in the incident.

**Format:** 3-Character Alphanumeric  
**Position:** 38–40  
**Occurrence:** Once per Offense Segment  
**Mandatory:** Yes  
**Edits:**

Data Element 6	(UCR Offense Code) The referenced data element must contain a valid data value when it is entered; blank is permissible on nonmandatory fields.	204
Data Element 6	When a Group A Incident Report is submitted, the individual segments comprising the incident cannot contain duplicates. In this case, two Offense Segments were submitted having the same offense in Data Element 6 (UCR Offense Code).	262
Data Element 6	(UCR Offense Code) Data Element 6 (UCR Offense Code) must be a Group A UCR Offense Code, not a Group B Offense Code.	264
Data Element 6	When a Justifiable Homicide is reported, no other offense may be reported in the Group A Incident Report. These should be submitted on another Group A Incident Report.	266

Data Element 6	Data Element 6 (UCR Offense Code) is a (23A-23H) = Larceny/Theft Offenses and a Property Segment exists with Data Element 14 (Type Property Loss/Etc.) of 7 = Stolen/Etc. and Data Element 15 (Property Description) of 03 = Automobiles, 05 = Buses, 24 = Other Motor Vehicles, 28 = Recreational Vehicles, or 37 = Trucks; then the incident must contain another Offense Segment with Data Element 6 (UCR Offense Code) containing a Crime Against Property other than a Larceny/Theft offense (refer to Appendix E: Mandatories for each Crime Against Property offense)	268

### 3.3.3.2 Data Element 7-Offense Attempted/Completed

Offense Attempted/Completed is used to indicate whether each offense in the incident was attempted or completed. When an offense occurs more than once within an incident and one of the offenses are completed, then C = Completed must be entered.

**Note:** Attempted Murder should be reported as Aggravated Assault and all Assault Offenses should be classified as C = Completed.

#### 3.3.4.2.1 Illogical Property Description for the Offense(s) Submitted

Property offenses identified below cannot have illogical property descriptions for stolen and/or recovered property. This includes Window submissions of recovered property. When the offense has fewer *allowable* values than *not allowed*, the allowable values are shown instead. These are indicated by YES or NO under the Allowed column. If multiple property offenses are submitted in an incident and one or more property offenses not listed below are present (e.g., embezzlement), then this edit is bypassed.

### 3.3.4.7 Data Element 20-Suspected Drug Type

Suspected Drug Type is used to identify the types of drugs or narcotics that were seized in a drug case.

This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with offenses other than 35A = Drug/Narcotic Violations such as 200 = Arson, 220 = Burglary/Breaking & Entering, or 23 (A-H) = Larceny/Theft Offenses.

When a substance is sent to a laboratory for analysis, and a response has not yet been received, then data value U = Unknown Drug Type must be entered. The drug type would then be updated when the laboratory results are received.

**Note:** When more than three types of drugs are involved, the two most important drugs (as determined by the reporting agency based on the quantity, value, and deadliness of the drugs/narcotics) should be reported in Drug Type 1 and Drug Type 2; X = Over 3 Drug Types should be entered in Drug Type 3.

- 1) One of the offenses entered in Data Element 6 (UCR Offense Code) is 35A = Drug/Narcotic Violations, Data Element 14 (Type Property Loss/Etc.) is 6 = Seized, and Data Element 15 (Property Description) is 10 = Drugs/Narcotics.

### 3.3.4.8 Data Element 21-Estimated Drug Quantity

Estimated Drug Quantity is used to indicate the quantity of drugs or narcotics seized in a drug case.

This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with offenses other than 35A = Drug/Narcotic Violations such as 200 = Arson, 220 = Burglary/Breaking & Entering, or 23 (A-H) = Larceny/Theft Offenses.

When a substance is sent to a laboratory for analysis, and a response has not yet been received, then data value 1 = None, i.e., 000000001000, must be entered. This quantity would then be updated with the true quantity when the laboratory results are received.

**Note:** When more than three types of drugs are involved, the quantity of the two most important drugs (as determined by the reporting agency based on the quantity, value, and deadliness of the drugs/narcotics) should be reported in Quantity 1 and Quantity 2; Quantity 3 should be left blank.

**Group:** A  
**Format:** 12-Character Numeric  
**Position:** 234–245 Quantity 1  
249–260 Quantity 2

**Mandatory:** Conditional

This data element is mandatory when Data Element 6 (UCR Offense Code) is 35A = Drug/Narcotic Violations, Data Element 14 (Type Property Loss/Etc.) is 6 = Seized, and Data Element 15 (Property Description) Is 10 = Drugs/Narcotics.

When the quantity is in whole units (no fractional unit in the last three characters), the last three characters must be 000 (blanks are acceptable). When the quantity is a fraction (no whole units in the first nine characters), the first nine characters must be 000000000 (blanks are acceptable).

#### 3.3.4.9 Data Element 22-Type Drug Measurement

Type Drug Measurement is used to indicate the type of measurement used in quantifying drugs or narcotics seized in a drug case.

This data element should not be used when drugs or narcotics were burned, stolen, etc., in connection with offenses other than 35A = Drug/Narcotic Violations such as 200 = Arson, 220 = Burglary/Breaking & Entering, or 23 (A-H) = Larceny/Theft Offenses.

When a substance is sent to a laboratory for analysis, and a response has not yet been received, then data value XX = Not Reported must be entered. The measurement type would then be updated when the laboratory results are received.

**Note:** When more than three types of drugs are involved, the type of measurement for the two most important drugs (as determined by the reporting agency based on the quantity, value, and deadliness of the drugs/narcotics) should be reported in Measurement Type 1 and Measurement Type 2; Measurement Type 3 should be left blank.

### 3.3.5 Victim Segment

The Victim Segment is used to describe the victims involved in the incident (e.g., their age, sex, race, and ethnicity). A separate Victim Segment should be submitted for each victim (up to 999) involved in the incident and there must be at least one Victim Segment submitted for each incident.

**Note:** In addition to the data elements specified, the Victim Segment also contains the Header Data Elements identified in Section 3.3.1, as well as Data Element 1 (ORI) and Data Element 2 (Incident Number) included in the Administrative Segment, Section 3.3.2. Data Element 23- Victim Sequence Number.

#### 3.3.5.1 Data Element 23-Victim Sequence Number

### 3.3.5.7 Data Element 26-Age of Victim

Age of Victim is used to indicate the age of an individual victim when the reported crime occurred. The data value for Age of Victim can be an exact age, a range of years, or unknown.

When Age of Victim is populated with an age range (i.e., 16 through 19), then the system will store the average age, decimal value truncated. For example, when the age range is 16 through 19, the average is 17.5 years old and is stored as 17 years.

Data Element 31	(Aggravated Assault/Homicide Circumstances) When a Justifiable Homicide is reported, Data Element 31 (Aggravated Assault/Homicide Circumstances) may only have codes of 20 = Criminal Killed by Private Citizen or 21 = Criminal Killed by Police Officer. In this case, a code other than the two mentioned was entered.	463
Data Element 31	(Aggravated Assault/Homicide Circumstances) A victim segment was submitted with Data Element 24 (Victim Connected to UCR Offense Code) having an offense that does not have a permitted code for Data Element 31 (Aggravated Assault/Homicide Circumstances).	477
Data Element 31	Data Element 31 (Aggravated Assault/Homicide Circumstances) has 08 = Other Felony Involved but the incident has only one offense. For this code to be used, there must be an Other Felony. Either multiple entries for Data Element 6 (UCR Offense Code) should have been submitted, or multiple individual victims should have been submitted for the incident report.	480

### 3.3.5.16 Data Element 35-Relationship of Victim to Offender

Relationship of Victim to Offender is used, along with Data Element 34 (Offender Number to be Related), to report the relationship of the victim to the offender(s) who perpetrated a Crime Against Person or a Crime Against Property against the victim.

When more than 10 offenders are identified in Data Element 36 (Offender Sequence Number), enter the relationship of the 10 most closely related to the victim. For example, when one of the offenders is the brother of the victim and the other 15 offenders were acquaintances of the victim, enter the information for the brother and 9 of the offenders who were acquaintances.

**Note:** Leave this data element blank when Data Element 36 (Offender Sequence Number) is 00 = Unknown Offender.

Data Element 35	(Relationship of Victim to Offender) cannot be entered when Data Element 34 (Offender Number to be Related) is zero. Zero means that the number of offenders is unknown; therefore, the relationship cannot be entered.	468
Data Element 35	(Relationship of Victim to Offender) has a relationship of VO = Victim Was Offender. When this code is entered, a minimum of two victim and two offender segments must be submitted. In this case, only one victim and/or one offender segment was submitted. The entry of VO on one or more of the victims indicates situations such as brawls and domestic disputes. In the vast majority of cases, each victim is also the offender; therefore, every victim record would contain a VO code.	470
Data Element 35	(Relationship of Victim to Offender) has relationships of VO = Victim Was Offender that point to multiple offenders, which is an impossible situation. A single victim cannot be two offenders.	471
Data Element 35	(Relationship of Victim to Offender) If Data Element 37 (Age of Offender) is 00 = Unknown, Data Element 38 (Sex of Offender) is U = Unknown, and Data Element 39 (Race of Offender) is U = Unknown, then Data Element 35 (Relationship of Victim to Offender) must be RU = Relationship Unknown.	472
Data Element 35	(Relationship of Victim to Offender) Segment Level 4 (Victim Segment) cannot be submitted multiple times with VO = Victim Was Offender in Data Element 35 (Relationship of Victim to Offender) when Data Element 34 (Offender Number to be Related) contains the same data value (indicating the same offender).	474

### 3.3.6 Offender Segment

The Offender Segment is used to describe the offenders in the incident (e.g., their age, sex, race, and ethnicity). An Offender Segment should be submitted for each of the offenders (up to 99) involved in the incident. There must be at least one Offender Segment in each incident report.

When nothing is known about the offender, then 00 = Unknown Offender must be entered in Data Element 36 (Offender Sequence Number) and Data Elements 37 through 39 should be left blank. For example, when a corpse is found in a ditch and there were no eyewitnesses or other information that would provide data about possible offenders, 00 = Unknown Offender should be entered. However, when witnesses report five offenders were running from the scene, and their age, sex, or race are not known, five Offender Segments should be submitted indicating the appropriate data elements are unknown.

**Note:** In addition to the data elements specified, the Offender Segment also contains the Header Data Elements identified in Section 3.3.1, as well as Data Element 1 (ORI) and Data Element 2 (Incident Number) included in the Administrative Segment, Section 3.3.2.

#### 3.3.6.1 Data Element 36-Offender Sequence Number

Offender Sequence Number is used to assign a sequence number from 01–99 for each offender in an incident.

**Group:** A  
**Format:** 2-Character Numeric  
**Position:** 38–39  
**Occurrence:** Once per Offender Segment

Data Element 36	Data Element 36 (Offender Sequence Number) must contain numeric entry (00 through 99) with zero left-fill.	502
Data Element 36	(Offender Sequence Number) When multiple Offender Segments are submitted, none can contain a 00 = Unknown value because the presence of 00 indicates that the number of offenders is unknown. In this case, multiple offenders were submitted, but one of the segments contains the 00 = Unknown value.	555
Data Element 36	(Offender Sequence Number) contains 00 indicating that nothing is known about the offender(s) regarding number and any identifying information. To exceptionally clear the incident, the value cannot be 00. The incident was submitted with Data Element 4 (Cleared Exceptionally) having a value of A through E.	557

Data Element 36	(Offender Sequence Number) The incident was submitted with Data Element 6 (UCR Offense Code) value of 09C = Justifiable Homicide or , but unknown information was submitted for all the offender(s). At least one of the offenders must have known information for age, sex, and race.	559

**Data Values:** 00 = Unknown Offender  
01–99

### 3.3.6.2 Data Element 37-Age of Offender

Age of Offender is used to indicate the age of the offender. The data value for Age of Offender can be an exact age, a range of years, or unknown.

For an exact age, use only record positions 40 and 41 (leave positions 42 and 43 blank). To enter an age range, enter the beginning age in the range in positions 40 and 41 and the ending age in the range in positions 42 and 43.

When Age of Offender is populated with an age range (i.e., 16 through 19), then the system will store the average age, decimal value truncated. For example, when the age range is 16 through 19, the average is 17.5 years old and is stored as 17 years.

**Group:** A  
**Format:** 4-Character Numeric

Data Element 37	(Age of Offender) was entered as an age-range. Therefore, the first age component cannot be 00 = Unknown.	522
Data Element 37	(Age of Offender) cannot be less than 13 years old when Data Element 35 (Relationship of Victim to Offender) contains a relationship of SE = Spouse.	550

Age of Offender Element Edits		
Data Element	Edit Description	Associated Error Code
Data Element 37	(Age of Offender) has a relationship that is inconsistent with the offender's age. The age of the victim, and/or offender, must reflect the implied relationship. For example, if the relationship of the victim to offender is PA = Parent, then the victim's age must be greater than the offender's age. The following relationships must be consistent with the victim's age in relation to the offender's age:  <i>Relationship Victim's Age Is</i> CH = Victim was Child Younger PA = Victim was Parent Older GP = Victim was Grandparent Older GC = Victim was Grandchild Younger	554
Data Element 37	(Age of Offender) must contain numeric entry of 00 through 99.	556
Data Element 37	(Offender Segment) None of the Offender Segments contain all known values for age, sex, and race. When an incident is cleared exceptionally (Data Element 4 contains an A through E), one offender must have all known values.	558

**Data Values:** 01–98 = Years Old (two-digit year or a range)  
99 = Over 98 Years Old  
00 = Unknown

**Note:** Any combination of years is valid for an age range. The younger age must be listed first in the range. For example, “2530” is a valid age range.

### 3.3.7 Arrestee Segment/Group B Arrest Report Segment

The Arrestee Segment and Group B Arrest Report Segment are used to report the apprehension of the persons who committed crimes (up to 99) reported for Group A and Group B offenses, to describe the arrestee (e.g., age, sex, race, and ethnicity), and to indicate the circumstances of the arrest.

One “Arrestee Segment” is submitted for each person arrested for committing offenses in an incident that involves at least one Group A offense. Therefore, both Group A and Group B offenses can be submitted in Data Element 45 (UCR Arrest Offense Code).

One Group B Arrest Report Segment is submitted for each person arrested for committing a Group B offense.

When the apprehension of an arrestee results in the submission of an Arrestee Segment for more than one incident within the jurisdiction of the LEA, Data Element 44 (Multiple Arrestee Segments Indicator) must contain C = Count Arrestee for one of the Arrestee Segments and M = Multiple must be entered for the remaining Arrestee Segments submitted for the incidents.

Differences between the Arrestee Segment and the Group B Arrest Report Segment are:

- The Arrestee Segment is uniquely identified by Data Element 1 (ORI), Data Element 2 (Incident Number), and Data Element 40 (Arrestee Sequence Number); the Group B Arrest Report Segment is uniquely identified by the Data Element 1 (ORI), Data Element 41 (Arrest Transaction Number), and Data Element 40 (Arrestee Sequence Number) and Data Element 2 (Incident Number) is not used.
- In the Group B Arrest Report Segment, Data Element 40 (Arrestee Sequence Number) and Data Element 41 (Arrest Transaction Number) are reversed.
- The record positions of many of the data elements are different when comparing the Arrestee Segment and the Group B Arrest Report Segment. The differences are noted in the various data element descriptions.
- The Group B Arrest Report Segment does not use Data Element 44 (Multiple Arrestee Segments Indicator).

**Note:** In addition to the data elements specified, the Arrestee Segment and Group B Arrest Report Segment also contain the Header Data Elements identified in Section 3.3.1, as well as Data Element 1 (ORI) and Data Element 2 (Incident Number) [for only the Arrestee Segment] included in the Administrative Segment, Section 3.3.2.

### 3.3.7.5 Data Element 44-Multiple Arrestee Segments Indicator

Multiple Arrestee Segments Indicator is used to ensure that an arrestee is counted only once when the arrestee's apprehension causes the reporting agency to submit two or more Arrestee Segments concerning separate Group A Incident Reports.

When the arrestee was involved in more than one crime and is arrested, enter C = Count Arrestee in one of the Arrestee Segments and enter M = Multiple in all of the remaining Arrestee Segments. When the arrest does not cause the reporting agency to submit multiple Arrestee Segments for the same arrestee, N = Not Applicable should be entered.

**Group:** A

To enter an age range, enter the beginning age in the range in the first two record positions and the ending age in the range in the last two positions.

When Age of Arrestee is populated with an age range (i.e., 16 through 19), then the system will store the average age, decimal value truncated. For example, when the age range is 16 through 19, the average is 17.5 years old and is stored as 17 years.

### 3.3.8 Zero Report Segment

The Zero Report Segment is used to report that the LEA has no crime, arrests, or recovered property to report for the given month. In order to compute valid crime rates and trends, it is necessary that the FBI be able to identify months during which no criminal activity occurred.

**Note:** In addition to the data elements specified, the Zero Report Segment also contains the Header Data Elements identified in Section 3.3.1, as well as Data Element 1 (ORI) and Data Element 2 (Incident Number) included in the Administrative Segment, Section 3.3.2.

Refer to Section 4.7, Zero Reporting, for additional information pertaining to the handling of zero reporting information.

#### 3.3.8.1 Data Element (unnumbered)-Zero Report Month

Zero Report Month is used to identify the month in which the LEA has no crime, arrests, or recovered property to report.

**Group:** N/A  
**Format:** 2-Character Numeric (MM)  
**Positions:** 38–39  
**Occurrence:** Once per Zero Report Segment  
**Mandatory:** Yes  
**Edits:**

**Table 3-71 Zero Report Month Edit Description**

Zero Report Month Element Edits		
Data Element	Edit Description	Associated Error Code
Zero Report Element (Month)	Mandatory Data Elements (Mandatory = Yes) must be populated with a valid data value and cannot be blank.	001
Zero Report Element (Month)	Zero Report Month must be a valid month, data values 01 through 12.	090
Zero Report Element (Month)	Zero Report Month and Zero Report Year cannot precede the month and year in the date the LEA converted to the NIBRS.	093
Zero Report Element (Month)	A Segment Level 0 was submitted with a month and year entered into positions 38 through 43 that was later than the Month of Electronic submission and Year of Electronic submission entered into positions 7 through 12.	094
Zero Report Element (Month)	The combined Zero Report Month and Zero Report Year cannot be on or after the date LEA is placed in Covered-by Status. When Zero Report data are received for a LEA in Covered-by Status, the FBI will remove the agency from Covered-by Status, process the submission, and notify the agency. Additionally, adjustments to previously submitted data from an agency now in Covered-by Status will be processed and no error generated.	096

#### Data Values:

01 = January	05 = May	09 = September
02 = February	06 = June	10 = October
03 = March	07 = July	11 = November
04 = April	08 = August	12 = December

### 3.3.8.2 Data Element (unnumbered)-Zero Report Year

Zero Report Year is used to identify the year in which Zero Report Month occurred.

**Group:** N/A

**Format:** 4-Character Numeric (YYYY)

**Position:** 40–43

**Occurrence:** Once per Zero Report Segment

**Mandatory:** Yes

**Edits:**

Zero Report Year Element Edits		
Data Element	Edit Description	Associated Error Code
Zero Report Element (Year)	Mandatory Data Elements (Mandatory = Yes) must be populated with a valid data value and cannot be blank.	001
Zero Report Element (Year)	Zero Report Month and Zero Report Year cannot precede the month and year in the date the LEA converted to the NIBRS.	093
Zero Report Element (Year)	A Segment Level 0 was submitted with a month and year entered into positions 38 through 43 that was later than the Month of Electronic submission and Year of Electronic submission entered into positions 7 through 12.	094

**Data Values:** 1991–Current Year

## 4 SUBMISSION SPECIFICATIONS

---

Data must be submitted monthly (or weekly per Governor’s request) via the Beyond 2020 Repository. This section describes the data submission format.

- Test submissions: via email to [ibradmin@vsp.virginia.gov](mailto:ibradmin@vsp.virginia.gov)
- Production submissions: via [Beyond 2020 Repository](#)

### 4.1 Segment Length

Each segment in a Group A Incident Report has its own fixed length, defined in the Header Data Element “Segment Length.” For example, an Administrative Segment (Level 1) with Cargo Theft must include 88 characters of data and the data value for Segment Length must be “0088”.

### 4.2 Data Records Must Be Initialized to Blanks

Each record written to a submission must first be initialized to “BLANKS” before data are moved into the applicable fields. This will provide filler for those varying Data Elements that do not have data because of the circumstances of the report or that are no longer used in the NIBRS.

### 4.3 Codes Must Be Right-Justified With Zero Left-Fill

Fields containing numeric data codes should be right justified with zero left-fill when there is data to be reported. For example, when Data Element 15 (Property Description) code is 05 = Buses, data value “05” would be entered, not “5b/” or “bb5” (bb = blank). The field should be filled with blanks when no data are to be reported. Refer to individual data element for specific formatting instructions.

### 4.4 Victim/Offender/Arrestee Sequence Numbers Can Have Gaps

Multiple Victim, Offender, and Arrestee Segments can have gaps in values entered into Data Elements 23 (Victim Sequence Number), 36 (Offender Sequence Number), and 40 (Arrestee Sequence Number). For instance, when four Offender Segments are submitted, the sequence numbers would normally be 01, 02, 03, and 04; but could be 02, 03, 05, and 07.

The gaps in numbers could occur, for instance, where all offenders are initially entered into the LEA’s database with consecutive sequence numbers. Then, one of the offenders is subsequently deleted, thus possibly leaving a gap in the sequence numbers. Forcing a renumbering of these numbers would be a complicated process, especially when multiple victims would have to be adjusted to reflect the renumbered offender numbers in Data Element 34 (Offender Number to be Related).

### 4.5 Segment Levels

The 68 numbered data elements and 11 structural data elements comprising a NIBRS data submission are grouped into eight distinct Segment Levels identified as Levels 0–7. Each segment must be identified by specifying the Segment Level data value. These values are identified in Section 3.3.1: Header Data Elements, and Section 3.3.1.2: Segment Level.

UCR programs are responsible for ensuring that all Group A Incident Report data for the LEAs that report to them are grouped in a submission by ORI (Data Element 1) and that the individual segments making up each Incident Number (Data Element 2) within the ORI are in sequence by Segment Level.

It is acceptable that the different ORIs themselves are not in sequence and that the different Incident Numbers are not in sequence within the submitted ORI.

It is not acceptable to intersperse Zero Report Segments (Level 0) and Group B Arrest Report Segments (Level 7) between Group A Incident Report segments (Levels 1–6).

## 4.6 Segment Action Types

Segment Action Type is a one-character alphabetic field. This data element identifies the processing to be performed by the system in relation to the specified segment and is located at the beginning of each segment in the Header Data Elements. These values are introduced in Section 3.3.1, Header Data Elements, and Segment Action Type.

The data values for Segment Action Type are:

### 4.6.1 I = Incident Report

**Applies to:** Group A Incident Report

- Level 1—Administrative Segment
- Level 2—Offense Segment
- Level 3—Property Segment
- Level 4—Victim Segment
- Level 5—Offender Segment
- Level 6—Arrestee Segment

**Description:** This value is used to submit all known data at the time a Group A Incident Report is initially submitted.

This Segment Action Type is also used to resubmit an entire Group A Incident Report previously reported to the FBI, but which is deleted because one or more segments needed to be added, modified, or deleted.

The LEA's system must be designed so that the first I = Incident Report submission is never preceded by a D = Delete action for that incident.

### 4.6.2 A = Add

**Applies to:** Group B Arrest Report

- Level 7—Group B Arrest Report Segment

**Description:** This value is used to submit all known data at the time a Group B Arrest Report is initially submitted.

**Applies to:** Zero Report Segment

- Level 0—Zero Report Segment

**Description:** This value is used to submit a Zero Report, meaning no incidents or arrests occurred during the reporting period.

### 4.6.3 D = Delete

**Note:** All segment level header data elements are required in addition to the specific data elements listed below. Failure to submit valid segment level header data elements will result in the generation of an error and the failure to delete the request incident. The required segment header data elements are below:

- Segment Length
- Segment Level
- Segment Action Type
- Month of Submission
- Year of Submission
- City Indicator (Applicable only to direct reports)

**Applies to:** Group A Incident Report

- Level 1–Administrative Segment

**Description:** This value is used to delete all data from the database that is associated with a Group A Incident Report.

When the Incident Number is on file, Segment Action Type D = Delete deletes all data from the database that is associated with a Group A Incident Report.

Segment Action Type D = Delete is not allowed for pre-NIBRS submissions (i.e., when there is no Group A Incident Report on file).

For Group A Incident data, the following data elements are mandatory with Segment Action Type D = Delete:

- Data Element 1 = ORI
- Data Element 2 = Incident Number
- Data Element 3 = Incident Date

**Note:** All other data elements are ignored.

**Applies to:** Group B Arrest Report

- Level 7–Group B Arrest Report Segment

**Description:** This value is used to delete the referenced Group B Arrest Report.

For Group B Incident data the following data elements are mandatory with Segment Action Type D = Delete:

- Data Element 1 = ORI
- Data Element 41 = Arrest Transaction Number
- Data Element 42 = Arrest Date

Data Element 40 = Arrestee Sequence Number is an optional addition to the Delete. If data element 40 = Arrest Sequence number exists, then only the specific arrestee is deleted. If data

element 40 = Arrest Sequence number is not entered, all arrestees associated with the arrest Transaction Number will be deleted.

All other data elements are ignored.

**Applies to:** Zero Report Segment

- Level 0–Zero Report Segment

**Description:** This value is used to delete the Zero Report Segment in the system for the specified ORI (Data Element 1), Zero Report Month, and Zero Report Year.

For Zero Report Segment data the following data elements are mandatory with Segment Action Type D = Delete:

- Data Element 1 = ORI
- Data Element 2 = Incident Number = 000000000000
- Zero Report Month
- Zero Report Year

## 4.7 Zero Reporting

When a Zero Report Segment is submitted by (or on behalf of) an agency for a specific month/year, and a Group A Incident or Group B Arrest Report is already on file, UCR will generate a “Cannot Add Zero Report” error (Zero Report Error 028 or 029, respectively). When a delete Zero Report Segment is submitted by (or on behalf of) an agency for a specific month/year, and a Group A Incident or Group B Arrest Report is already on file, UCR will generate a “Cannot Delete Zero Report” error (Zero Report Error 030 or 031, respectively).

When a Group A Incident or Group B Arrest Report is submitted by an agency for a specific month/year, and a Zero Report indicator is already on file for that agency’s month/year, UCR will process the submission and automatically remove the Zero Report indicator.

## 5 ERRORS & WARNINGS

---

This section describes error codes and error handling related to submissions. Submissions with errors will be sent back to the submitting agency for correction.

A list of the software edits used by the FBI for each data element is provided in Section 3.3, Data Element Descriptions and a complete listing of edits for each segment is provided in Section 5.2, Error Numbers and Messages. **Reporting agencies should incorporate these edits in their IBR systems.**

### 5.1 Error Data Set

All detected errors will be visible in the Repository Module of Beyond 2020. The error code and a synopsis of the error are visible in both the Status of the upload and the Error/Warning tab.

The following FBI error information is specific to Virginia State Police reporting on the behalf of all Virginia agencies.

All FBI-detected errors will be written to the Error Data Set (EDS) following the EDS record layout. The EDS file will then be returned to the reporting agency for error correction. The EDS will be in ASCII text format with records 146 characters in length.

When a Group A Incident Report contains 25 segments and one segment contains an error, only the error for this particular segment will be written to the EDS. The other 24 segments will not be written to the EDS even though they have also been rejected by the FBI. The EDS only contains descriptions of errors; no references are made to valid segments rejected as a result of other FBI-detected errors within the incident report.

In addition to any error records generated, an ending record will always be written on the EDS indicating that the submission was processed by the FBI. Record positions 15–23, the ORI field, will contain 9 nines (999999999) and record positions 62 to 140, the Error Message field, will contain “FBI processed submission on MM/DD/YYYY”. When this record is not on the EDS, the CSMU should be contacted so the submission can be traced.

The table on the next page describes the EDS Record Layout:

**Table 5-1 EDS Record Layout**

EDS Record Layout

141–146	Unused Field (blank)	The FBI no longer uses this field.

## 5.2 Error Numbers and Messages

This reference listing provides all of the error numbers that are returned on the EDS, their associated error messages, and brief descriptions of the errors. Brief descriptions of each error follow.

### 5.2.1 Structure Check Errors

**Table 5-2 Structure Check Errors**

Structure Check Errors		
Error Number	Error Message	Error Description
050	SEGMENT LEVELS ARE OUT OF NUMERICAL ORDER FOR THIS INCIDENT	Segment Levels in a Group A Incident Report must be organized in numerical order. For example, an incident having segments 1, 2, 2, 3, 4, 4, 4, 5 must be written in that order, not as 1, 2, 2, 5, 3, 4, 4, 4.
051	INVALID RECORD LEVEL ON SUBMISSION	Segment Level must contain a valid data value 0–7.
055	CANNOT HAVE A GROUP A INCIDENT REPORT WITHOUT LEVEL 1 SEGMENT	Segment Level 1 (Administrative Segment) with Segment Action Type I = Incident Report must be the first segment submitted for each Group A Incident Report.
056	DUPLICATE INCIDENT- PREVIOUSLY ADDED	Data Element 2 (Incident Number) must be a unique number for each incident submitted. No two incidents can have the same incident number.
058	ALL SEGMENTS IN A SUBMISSION MUST HAVE SAME MONTH AND YEAR OF SUBMISSION	Month of Submission and Year of Submission must contain the same data values for each segment in a NIBRS submission. The first segment processed will be compared with all other segments to check for this condition.
059	ALL SEGMENTS IN SUBMISSION MUST BE FROM SAME STATE	Data Element 1 (ORI) must contain the same state abbreviation code (e.g., SC, MD, etc.) in the first two positions (record positions 17 & 18). For non-federal LEAs, every segment in a submission must have the same state code in the first two positions of the ORI.
060	PROCESSING DATE PRECEDES MONTH AND YEAR OF SUBMISSION	Month of Submission and Year of Submission cannot be after the date the FBI receives and processes a NIBRS submission. This edit checks for data submitted for a future month/year.
065	EACH OFFENSE MUST HAVE AT LEAST ONE VICTIM	Segment Level 2 (Offense Segment) must have at least one Segment Level 4 (Victim Segment) connected to it by entering the offense code identified in Data Element 6 (UCR Offense Code) in Data Element 24 (Victim Connected to UCR Offense Code).
070	THE CORRESPONDING OFFENDER SEGMENT MUST EXIST	Data Element 34 (Offender Number to be Related) has a value that does not have a corresponding Offender Segment. For example, if the field value shown in Data Element 34 is 15, an Offender Segment does not exist with a value of 15 in Data Element 36 (Offender Sequence Number).

Structure Check Errors		
Error Number	Error Message	Error Description
071	CANNOT HAVE ARRESTS WHEN CLEARED EXCEPTIONALLY	Segment Level 6 (Arrestee Segment) with Segment Action Type I = Incident Report cannot be submitted with Data Element 42 (Arrest Date) containing an arrest date on or earlier than the date entered in Data Element 5 (Exceptional Clearance Date) when Data Element 4 (Cleared Exceptionally) contains a data value other than N = Not Applicable (indicating the incident is cleared exceptionally).
072	RECOVERED PROPERTY MUST ALSO BE SUBMITTED AS STOLEN	<p>Segment Level 3 (Property Segment) must first be submitted with Data Element 14 (Type Property Loss/Etc.) as 7 = Stolen/Etc. before it can be submitted as 5 = Recovered for the <i>same property</i> in Data Element 15 (Property Description). Any property being reported as recovered must first be reported as stolen. There are exceptions to this rule:</p> <ol style="list-style-type: none"> <li>1) When Data Element 6 (UCR Offense Code) contains an offense that allows property to be recovered without first being stolen in that same incident (i.e., 250 = Counterfeiting/ Forgery and 280 = Stolen Property Offenses, ).</li> <li>2) When a vehicle was stolen and the recovered property in Data Element 15 (Property Description) is 38 = Vehicle Parts/Accessories.</li> </ol>
073	NUMBER OF RECOVERED VEHICLES CANNOT BE GREATER THAN THE NUMBER STOLEN	Segment Level 3 (Property Segment) with Segment Action Type I = Incident Report must contain a data value in Data Element 18 (Number of Stolen Motor Vehicles) greater than or equal to the data value entered in Data Element 19 (Number of Recovered Motor Vehicles) within the same incident.
074	PROPERTY SEGMENT MUST EXIST WITH THIS OFFENSE	Segment Level 3 (Property Segment) with Segment Action Type I = Incident Report must be submitted when Data Element 6 (UCR Offense Code) contains an offense of Kidnapping/Abduction, Crimes Against Property, Drug/Narcotic Offenses, or Gambling Offenses.
075	MISSING A MANDATORY SEGMENT LEVEL FOR A COMPLETE INCIDENT	Segment Levels 1, 2, 4, and 5 (Administrative Segment, Offense Segment, Victim Segment, and Offender Segment) with Segment Action Type I = Incident Report must be submitted for each Group A Incident Report; they are mandatory.

Structure Check Errors		
Error Number	Error Message	Error Description

085	EACH VICTIM MUST BE CONNECTED TO AT LEAST TWO OFFENDERS	Segment Level 4 (Victim Segment) with a data value in Data Element 24 (Victim Connected to UCR Offense Code) of a Crime Against Person or Robbery must contain at least two offender sequence numbers in Data Element 34 (Offender Number to be Related) when there are two or more Segment Level 5 (Offender Segment) records submitted for the incident, and Data Element 25 (Type of Victim) is I = Individual or L = Law Enforcement.
088	GROUP A AND GROUP B CANNOT HAVE SAME IDENTIFIER	Segment Level 6 (Arrestee Segment) and Segment Level 7 (Group B Arrest Report Segment) cannot have the same data values entered in Data Element 2 (Incident Number) and Data Element 41 (Arrest Transaction Number), respectively, for the same ORI.
090	ZERO REPORTING MONTH IS NOT 01-12	A Segment Level 0 was submitted that had an invalid reporting month in positions 38 through 39. The data entered must be a valid month of 01 through 12.
091	ZERO-REPORTING YEAR IS INVALID	A Segment Level 0 was submitted that did not have four numeric digits in positions 40 through 43.
092	ZERO REPORTING INCIDENT NUMBER MUST BE ALL ZEROS	(Incident Number) Zero-Reporting Segment (Level 0) must contain 12 zeros as the Incident Number.
093	ZERO REPORT MONTH/YEAR IS PRIOR TO AGENCY CONVERSION TO THE NIBRS	Zero Report Month and Zero Report Year cannot precede the month and year in the date the LEA converted to the NIBRS.

094	ZERO REPORT MONTH/YEAR EXCEEDED MONTH/YEAR OF SUBMISSION	A Segment Level 0 was submitted with a month and year entered into positions 38 through 43 that was later than the Month of Electronic submission and Year of Electronic submission entered into positions 7 through 12.
095	PRE-NIBRS SEGMENTS CANNOT BE DELETED IN THIS WAY	An instruction to delete data in NIBRS before the agency transitioned to NIBRS, which is not allowed.
096	ZERO REPORT MONTH & ZERO REPORT YEAR CANNOT BE ON OR AFTER DATE AGENCY IS PLACED ON COVERED-BY STATUS	The combined Zero Report Month and Zero Report Year cannot be on or after the date an LEA is placed in Covered-by Status. When Zero Report data are received for a LEA in Covered-by Status, the FBI will remove the agency from Covered-by Status, process the submission, and notify the agency. Additionally, adjustments to previously submitted data from an agency now in Covered-by Status will be processed and no error generated.
931	THE ORI INFORMATION IS DUPLICATED IN THE REFERENCE DATA	The ORI exists in the reference table for a different agency. Verify that the ORI is accurate.
932	INVALID ORI FORMAT - THE ORI WAS NOT FOUND IN THE REFERENCE DATA	The ORI submitted was not found in the reference data table. Verify that the submitting agency is providing an accurate ORI for the data submission.
933	THE ORI IS COVERED BY ANOTHER AGENCY	The ORI submitted is currently in a Covered-by status. Verify that the information being provided is accurate and/or to ensure that the submitting agency is now providing its own information and is no longer in Covered-by status.
934	THE ORI IS MARKED AS DELETED IN THE REFERENCE DATA	The ORI submitted has been marked for deletion. Verification is needed to ensure this is accurate.
935	NIBRS CERTIFICATION DATE DOES NOT EXIST	Data was submitted by an agency that does not have a NIBRS certification date set in the FBI database. Agencies and/or state programs must first pass a testing phase to achieve NIBRS certification and then the FBI reference data administrator can enter a certification date into the system.

937	PRE-NIBRS INCIDENT RECEIVED	An incident has been submitted with an incident date that predates the agency's NIBRS start date. Pre-NIBRS incidents are submitted to add additional information that occurred after the NIBRS start date for crimes that occurred when the agency was still submitting Summary data. For example, a burglary was submitted via SRS in January. The agency started submitting via NIBRS February 1st. An offender was arrested for the January burglary in February. The agency will send a NIBRS incident with the new information of an arrest. We will only count the arrest in the database, since the offense itself is Pre-NIBRS and would have previously been reported via a Summary submittal.
938	MULTIPLE INCIDENTS ON FILE	Action Type of "A" is used, and there are multiple incidents on file for the same agency/incident number.
939	CANNOT MODIFY PRE-NIBRS GROUP B INCIDENT	Action Type of "M" is used for a Group B Arrest and the Arrest Date is before the agency transitioned to NIBRS.
940	EXCEPTIONAL CLEARANCE ALREADY ON FILE	Agency is trying to add an exceptional clearance and the incident has already been exceptionally cleared either by circumstances or arrest.
941	WEB SERVICE SUBMISSION ALREADY IN PROCESS	Agency is trying to perform any insert or replace action for a Group A/Group B Incident while an action is currently pending for the same agency/incident number in web services.
952	INVALID ORI FORMAT - NOT A VALID ORI - NOT IN UCR ORI FILE	Data Element 1 (ORI) and Data Element 25C (Officer–ORI Other Jurisdiction) must be a valid nine-character NCIC ORI.

Administrative Segment Errors		
Error Number	Error Message	Error Description
101	MUST BE PRESENT—MANDATORY FIELD	The referenced data element in an incident must contain data when the referenced data element is mandatory or when the conditions are met for data that must be entered into a conditionally mandatory field.
104	INVALID DATA VALUE-NOT ON FBI VALIDATION TABLE	The referenced data element must contain a valid data value when it is entered; blank is permissible on nonmandatory fields.
105	INVALID DATA VALUE FOR DATE	The data element in error contains a date that is not entered correctly. Each component of the date must be valid; that is, months must be 01 through 12, days must be 01 through 31, and year must include the century (i.e., 19xx, 20xx). In addition, days cannot exceed maximum for the month (e.g., June cannot have 31days). Also, the date cannot exceed the current date.
106	INVALID DATA VALUE FOR HOUR	(Incident Hour) For offenses of 09A, 13A, 13B and 13C only—When Data Element 25 (Type of Victim) is L = Law Enforcement Officer, then Data Element 3 (Incident Date/Hour) must be populated with a valid hour (00-23). Incident Hour Unknown (Blank) is not a valid entry.
115	CANNOT HAVE EMBEDDED BLANKS BETWEEN FIRST AND LAST NON-BLANK CHARACTERS	(Incident Number) Must be blank right-fill if under 12 characters in length. Cannot have embedded blanks between the first and last characters entered.
116	MUST BE LEFT JUSTIFIED BLANK DETECTED IN FIRST POSITION	(Incident Number) must be left-justified with blank right-fill. Since the number is less than 12 characters, it must begin in position 1.
117	CANNOT HAVE CHARACTERS OTHER THAN A–Z, 0–9, AND/OR HYPHEN, AND/OR BLANKS	Must contain a valid character combination of the following: <ul style="list-style-type: none"> <li>• A–Z (capital letters only)</li> <li>• 0–9</li> <li>• Hyphen</li> </ul> Example: 11-123-SC is valid, but 11+123*SC is not valid.
118	DATE CANNOT BE ON OR AFTER THE INACTIVE DATE OF THE ORI	The UCR Program has determined that an ORI will no longer be submitting data to the FBI as of an inactive date. The UCR Program will not accept data from the ORI after this date.

151	REPORT INDICATOR MUST BE BLANK OR R	<p>This field must be blank if the Incident Date is known. If the Incident Date is unknown, then the Report Date would be entered instead and must be indicated with an "R" in the Report Indicator field within the Administrative Segment.</p>

152	INVALID HOUR ENTRY	<p>If Hour is entered within Data Element 3 (Incident Date/Hour), it must be 00 through 23. If 00 = Midnight is entered, be careful that the Incident Date is entered as if the time was 1 minute past midnight.</p> <p><b>Note:</b> When an incident occurs exactly at midnight, Data Element 3 (Incident Date) would be entered as if the time is 1 minute past midnight. For example, when a crime occurred exactly at midnight on Thursday, Friday's date would be entered.</p>
153	VALUE ENTERED CONFLICTS WITH PRESENCE OF AN ENTRY IN EXCEPTIONAL CLEARANCE DATE	Data Element 4 (Cleared Exceptionally) cannot be N = Not Applicable if Data Element 5 (Exceptional Clearance Date) is entered.
155	CLEARANCE DATE PREDATES INCIDENT DATE	Data Element 5 (Exceptional Clearance Date) is earlier than Data Element 3 (Incident Date/Hour).
156	AN ENTRY MUST BE MADE WHEN CLEARED EXCEPTIONALLY HAS ENTRIES OF A-E	Data Element 5 (Exceptional Clearance Date) must be present if the case was cleared exceptionally. Data Element 4 (Cleared Exceptionally) has an entry of A through E; therefore, the date must also be entered.
170	INCIDENT DATE CANNOT BE AFTER MONTH AND YEAR OF ELECTRONIC SUBMISSION	Data Element 3 (Incident Date/Hour) The date cannot be later than the year and month the electronic submission represents. For example, the May 1999 electronic submission cannot contain incidents happening after this date.
172	INCIDENT DATE/HOUR FOR I RECORDS CANNOT PREDATE 01/01/1991	Data Element 3 (Incident Date) cannot be earlier than 01/01/1991. This edit will preclude dates that are obviously incorrect since the FBI began accepting NIBRS data on this date.
173	INCIDENT DATE IS BEFORE DATE ORI WENT IBR	A Group "A" Incident Report was submitted with Data Element 3 (Incident Date/Hour) containing a date that occurred before the agency converted over to NIBRS.
175	CANNOT CALCULATE BASE DATE FROM INCIDENT DATE	The electronic submission control date (positions 7 through 12, month and year) and Data Element 3 (Incident Date/Hour) must both be valid dates for calculating timeframes.
178	THIS ADMINISTRATIVE SEGMENT HAS A CONFLICTING LENGTH	<p>Segment Length for the Administrative Segment (Level 1) must be 87 characters (not reporting Cargo Theft) or 88 characters (reporting Cargo Theft). Once an agency begins participation in reporting Cargo Theft, indicated by 0088 in the RDW, then all future Administrative Segments within that ORI must be formatted using 0088.</p> <p><b>Note:</b> The only exception would be that data prior to the agency starting to report Cargo Theft could be submitted with the original 0087 RDW.</p>

Administrative Segment Errors		
Error Number	Error Message	Error Description
197	MISSING INCIDENT DATE FOR DELETE	Data Element 3 (Incident Date) is missing for a Group A Incident Report with a Segment Action Type of D = Delete; must be populated with a valid data value and cannot be blank.
198	MISSING INCIDENT DATE FOR DELETE - INCIDENT NUMBER MATCHES GROUP A INCIDENT REPORTS WITH INCIDENT DATE OUTSIDE TWO YEAR WINDOW	Data Element 3 (Incident Date) is missing for a Group A Incident Report with a Segment Action Type of D = Delete; at least one Group A Incident Report is on file that matches Data Element 2 (Incident Number) with an Incident Date outside the two year window.
199	MISSING INCIDENT DATE FOR DELETE - INCIDENT NUMBER MATCHES MULTIPLE GROUP A INCIDENT REPORTS	Data Element 3 (Incident Date) is missing for a Group A Incident Report with a Segment Action Type of D = Delete; must be populated with a valid data value and cannot be blank. Incident Number matches multiple Group A Incident Reports.

253	MUST BE PRESENT WHEN OFFENSE CODE IS 220	Data Element 11 (Method of Entry) was not entered; it must be entered when UCR Offense Code of 220 = Burglary/Breaking & Entering has been entered.
254	MUST BE BLANK WHEN OFFENSE IS OTHER THAN 220	Data Element 11 (Method of Entry) only applies to UCR Offense Code of 220 = Burglary/Breaking & Entering. Since a burglary offense was not entered, the Method of Entry should not have been entered.
255	AUTOMATIC INDICATOR MUST BE BLANK OR A	Must be A = Automatic or blank = Not Automatic
256	OFFENSE CODES OF 09A, 09B, 09C, 13A, 13B, 13C, AND 360 MUST HAVE ENTRY OF COMPLETED	Code must be C = Completed if Data Element 6 (UCR Offense Code) is an Assault or Homicide.

454	MUST BE ENTERED WHEN VICTIM TYPE IS LAW ENFORCEMENT OFFICER	Data Element 25A (Type of Officer Activity/Circumstance), Data Element 25B (Officer Assignment Type), Data Element 26 (Age of Victim), Data Element 27 (Sex of Victim), and Data Element 28 (Race of Victim) must be entered when Data Element 25 (Type of Victim) is L = Law Enforcement Officer.
455	ADDITIONAL JUSTIFIABLE HOMICIDE IS MANDATORY WITH A 20 OR 21 ENTERED	Data Element 31 (Aggravated Assault/Homicide Circumstances) contains: 20 = Criminal Killed by Private Citizen or 21 = Criminal Killed by Police Officer, but Data Element 32 (Additional Justifiable Homicide Circumstances) was not entered.
456	MULTIPLE VALUES ENTERED FOR DATA ELEMENT ARE NOT COMPATIBLE - VALUES ARE MUTUALLY EXCLUSIVE	Data Element 31 (Aggravated Assault/Homicide Circumstances) was entered with two entries but was rejected for one of the following reasons: <ol style="list-style-type: none"> <li>1) 10 = Unknown Circumstances is mutually exclusive with any other value.</li> <li>2) Multiple values from more than one category were entered.</li> <li>3) Values from the category 09B = Negligent Manslaughter are mutually exclusive with any other value.</li> <li>4) Values from the category 09C = Justifiable Homicide are mutually exclusive with any other value.</li> </ol>

Victim Segment Errors		
Error Number	Error Message	Error Description
462	INVALID AGGRAVATED ASSAULT/HOMICIDE FOR 13A OFFENSE	Data Element 31 (Aggravated Assault/Homicide Circumstances) can only have codes of 01 through 06 and 08 through 10 when Data Element 24 (Victim Connected to UCR Offense) is 13A = Aggravated Assault. All other codes, including 07 = Mercy Killing, are not valid because they do not relate to an aggravated assault.
463	INVALID AGGRAVATED ASSAULT/HOMICIDE FOR 09C OFFENSE	When a Justifiable Homicide is reported, Data Element 31 (Aggravated Assault/Homicide Circumstances) can only have codes of 20 = Criminal Killed by Private Citizen or 21 = Criminal Killed by Police Officer. 465	ENTRY FOR TYPE OF VICTIM MUST BE S WHEN THIS OFFENSE CODE IS ENTERED	(Type of Victim) must have a value of S = Society/Public when Data Element 24 (Victim Connected to UCR Offense Code) contains a Crime Against Society. Exception: *
466	OFFENSE MUST BE SUBMITTED AS LEVEL 2 RECORD IF VICTIM IS CONNECTED	Each UCR Offense Code entered into Data Element 24 (Victim Connected to UCR Offense Code) must have the Offense Segment for the value. In this case, the victim was connected to offenses that were not submitted as Offense Segments. A victim cannot be connected to an offense when the offense itself is not present.
467	ENTRY FOR TYPE OF VICTIM CANNOT BE S WHEN THIS OFFENSE CODE IS ENTERED	(Type of Victim) cannot have a value of S = Society/Public when Data Element 24 (Victim Connected to UCR Offense Code) contains a Crime Against Property.
468	RELATIONSHIP CANNOT BE ENTERED WHEN RELATED TO OFFENDER NUMBER 00	Data Element 35 (Relationship of Victim to Offender) cannot be entered when Data Element 34 (Offender Number to be Related) is zero. Zero means that the number of offenders is unknown; therefore, the relationship cannot be entered.

Error Number	Error Message	Error Description
469	VICTIM SEX MUST BE M OR F FOR AN 11A OR 36B OFFENSE	Data Element 27 (Sex of Victim) must be M = Male or F = Female to be connected to offense codes of 11A = Rape and 36B = Statutory Rape.
470	WHEN VO RELATIONSHIP IS PRESENT, MUST HAVE TWO OR MORE VICTIMS AND OFFENDERS	Data Element 35 (Relationship of Victim to Offender) has a relationship of VO = Victim Was Offender. When this code is entered, a minimum of two victim and two offender segments must be submitted. In this case, only one victim and/or one offender segment was submitted. The entry of VO on one or more of the victims indicates situations such as brawls and domestic disputes. In the vast majority of cases, each victim is also the offender; therefore, every victim record would contain a VO code.
471	ONLY ONE VO RELATIONSHIP PER VICTIM	Data Element 35 (Relationship of Victim to Offenders) has relationships of VO = Victim Was Offender that point to multiple offenders, which is an impossible situation. A single victim cannot be two offenders.
472	WHEN OFFENDER AGE/SEX/RACE ARE UNKNOWN, RELATIONSHIP MUST BE RU=UNKNOWN	If Data Element 37 (Age of Offender) is 00 = Unknown, Data Element 38 (Sex of Offender) is U = Unknown, and Data Element 39 (Race of Offender) is U = Unknown, then Data Element 35 (Relationship of Victim to Offender) must be RU = Relationship Unknown.

475	ONLY ONE SE RELATIONSHIP PER VICTIM	A victim can only have one spousal relationship. In this instance, the victim has a relationship of SE = Spouse to two or more offenders.
476	ONLY ONE SE RELATIONSHIP CAN BE ASSIGNED TO A SPECIFIC OFFENDER	An offender can only have one spousal relationship. In this instance, two or more victims have a relationship of SE = Spouse to the same offender.
477	INVALID AGGRAVATED ASSAULT/HOMICIDE CIRCUMSTANCES FOR CONNECTED OFFENSE	A victim segment was submitted with Data Element 24 (Victim Connected to UCR Offense Code) having an offense that does not have a permitted code for Data Element 31 (Aggravated Assault/Homicide Circumstances).

479	SIMPLE ASSAULT(13B) CANNOT HAVE MAJOR INJURIES	A Simple Assault (13B) was THE ONLY CRIME AGAINST PERSON OFFENSE committed against a victim, but the victim had major injuries/trauma entered for Data Element 33 (Type Injury). Either the offense should have been classified as an 13A = Aggravated Assault or the victim's injury should not have been entered as major.
480	WHEN ASSAULT/HOMICIDE (31) IS 08, INCIDENT MUST HAVE TWO OR MORE OFFENSES	Data Element 31 (Aggravated Assault/Homicide Circumstances) has 08 = Other Felony Involved but the incident has only one offense. For this code to be used, there must be an Other Felony. Either multiple entries for Data Element 6 (UCR Offense Code) should have been submitted, or multiple individual victims should have been submitted for the incident report.

481	VICTIM'S AGE IS 18 OR OVER FOR STATUTORY RAPE OFFENSE	Data Element 26 (Age of Victim) should be under 18 when Data Element 24 (Victim Connected to UCR Offense Code) is 36B = Statutory Rape.
482	LEOKA VICTIM MUST BE CONNECTED TO MURDER OR ASSAULT OFFENSE	Data Element 25 (Type of Victim) cannot be L = Law Enforcement Officer unless Data Element 24 (Victim Connected to UCR Offense Code) is one of the following: 09A = Murder & Nonnegligent Manslaughter 13A = Aggravated Assault 13B = Simple Assault 13C = Intimidation
483	VICTIM MUST BE LAW ENFORCEMENT OFFICER TO ENTER LEOKA DATA	Data Element 25A (Type of Officer Activity/ Circumstance), Data Element 25B (Officer Assignment Type), Data Element 25C (Officer–ORI Other Jurisdiction), may be entered only when Data Element 25 (Type of Victim) is L = Law Enforcement Officer.
484	THIS VICTIM SEGMENT HAS A CONFLICTING LENGTH	Segment Length for the Victim Segment (Level 4) must be 129 characters (not reporting LEOKA) or 141 characters (reporting LEOKA). Once an agency begins participation in reporting the LEOKA via NIBRS data elements 25A/25B/25C, indicated by 0141 in the RDW, then all future Victim Segments within that ORI must be formatted using 0141.  <b>Note:</b> The only exception would be that data prior to the agency starting to report LEOKA via the NIBRS data elements, could be submitted with the original 0129 RDW.
485	OFFENDER NUMBER TO BE RELATED CANNOT BE 00 FOR THIS OFFENSE	(Offender Number to be Related) cannot be 00 = Unknown when Data Element 24 (Victim Connected to UCR Offense Code) is .

## 5.2.6 Offender Segment Errors

**Table 5-8 Offender Segment Errors**

Offender Segment Errors		
Error Number	Error Message	Error Description
501	MUST BE PRESENT—MANDATORY FIELD	The referenced data element in an incident must contain data when the referenced data element is mandatory or when the conditions are met for data that must be entered into a conditionally mandatory field.
502	CONTAINS NONNUMERIC ENTRY	Data Element 36 (Offender Sequence Number) must contain numeric entry (00 through 99) with zero left-fill.
504	INVALID DATA VALUE	The referenced data element must contain a valid data value when it is entered; blank is permissible on nonmandatory fields.
508	EXACT AGE MUST BE IN FIRST TWO POSITIONS	Data Element 37 (Age of Offender) contains data but is not left-justified. A single two-character age must be in positions 1 through 2 of the field.
509	CONTAINS NONNUMERIC ENTRY	Data Element 37 (Age of Offender) contains more than two characters indicating a possible age-range is being attempted. If so, the field must contain a numeric entry of four digits.
510	FIRST AGE MUST BE LESS THAN SECOND FOR AGE RANGE	Data Element 37 (Age of Offender) was entered as an age-range. Accordingly, the first age component must be less than the second age.
515	CANNOT HAVE EMBEDDED BLANKS BETWEEN FIRST AND LAST NON-BLANK CHARACTERS	Must be blank right-fill if under 12 characters in length. Cannot have embedded blanks between the first and last characters entered.
516	MUST BE LEFT-JUSTIFIED—BLANK DETECTED IN FIRST POSITION	Must be left-justified with blank right-fill if under 12 characters in length.
517	CANNOT HAVE CHARACTERS OTHER THAN A–Z, 0–9, AND/OR HYPHEN, AND/OR BLANKS	<p>Must contain a valid character combination of the following:</p> <ul style="list-style-type: none"> <li>• A–Z (capital letters only)</li> <li>• 0–9</li> <li>• Hyphen</li> </ul> <p>Example: 11-123-SC is valid, but 11+123*SC is not valid.</p>
522	AGE RANGE CANNOT HAVE 00 IN FIRST TWO POSITIONS	Data Element 37 (Age of Offender) was entered as an age-range. Therefore, the first age component cannot be 00 = Unknown.
550	OFFENDER IS SPOUSE, BUT AGE IS LESS THAN 13	Data Element 37 (age of Offender) cannot be less than 13 years old when Data Element 35 (Relationship of Victim to Offender) contains a relationship of SE = Spouse.

Offender Segment Errors		
Error Number	Error Message	Error Description
551	DUPLICATE OFFENDER SEGMENT	When a Group A Incident Report is submitted, the individual segments comprising the incident cannot contain duplicates. In this case, two Offender Segments were submitted having the same entry in Data Element 36 (Offender Sequence Number).
552	CANNOT BE PRESENT WHEN OFFENDER NUMBER IS 00 UNKNOWN	Data Element 37 (Age of Offender) cannot be entered when Data Element 36 (Offender Sequence Number) is 00 = Unknown.
554	AGE OF VICTIM AND OFFENDER DOES NOT REFLECT THE RELATIONSHIP	<p>Data Element 35 (Relationship of Victim to Offender) has a relationship that is inconsistent with the offender's age. The age of the victim and/or offender must reflect the implied relationship. For example, if the relationship of the victim to offender is PA = Parent, then the victim's age must be greater than the offender's age. The following relationships must be consistent with the victim's age in relation to the offender's age:</p> <p><i>Relationship Victim's Age Is:</i>            CH = Victim was Child (Younger)            PA = Victim was Parent (Older)            GP = Victim was Grandparent (Older)            GC = Victim was Grandchild (Younger)</p>
555	OFFENDER 00 EXISTS-CANNOT SUBMIT MORE OFFENDERS	When multiple Offender Segments are submitted, none can contain a 00 = Unknown value because the presence of 00 indicates that the number of offenders is unknown. In this case, multiple offenders were submitted, but one of the segments contains the 00 = Unknown value.
556	OFFENDER AGE MUST BE NUMERIC DIGITS	Data Element 37 (Age of Offender) must contain numeric entry of 00 through 99.
557	OFFENDER SEQUENCE NUMBER CANNOT BE UNKNOWN IF INCIDENT CLEARED EXCEPTIONALLY	Data Element 36 (Offender Sequence Number) contains 00 indicating that nothing is known about the offender(s) regarding number and any identifying information. To exceptionally clear the incident, the value cannot be 00. The incident was submitted with Data Element 4 (Cleared Exceptionally) having a value of A through E.
558	AT LEAST ONE OFFENDER MUST HAVE KNOWN VALUES	None of the Offender Segments contain all known values for age, sex, and race. When an incident is cleared exceptionally (Data Element 4 contains an A through E), one offender must have all known values.
559	OFFENDER DATA MUST BE PRESENT IF OFFENSE CODE IS 09C = JUSTIFIABLE HOMICIDE OR	The incident was submitted with Data Element 6 (UCR Offense Code) value of 09C = Justifiable Homicide or , but unknown information was submitted for all the offender(s). At least one of the offenders must have known information for age, sex, and race.

584	THIS OFFENDER SEGMENT HAS A CONFLICTING LENGTH	<p>Segment Length for the Offender Segment (Level 5) must be 45 characters (not reporting Offender Ethnicity) or 46 characters (reporting Offender Ethnicity). Once an agency begins participation in reporting the Offender Ethnicity, indicated by 0046 in the RDW, then all future Offender Segments within that ORI must be formatted using 0046.</p> <p><b>Note:</b> The only exception would be that data prior to the agency starting to report Offender Ethnicity could be submitted with the original 0045 RDW.</p>

Arrestee Segment Errors		
Error Number	Error Message	Error Description
601	MUST BE PRESENT—MANDATORY FIELD	The referenced data element in an Incident must contain data when the referenced data element is mandatory or when the conditions are met for data that must be entered into a conditionally mandatory field.
602	CONTAINS NONNUMERIC ENTRY	(Arrestee Sequence Number) must be numeric entry of 01 to 99 with zero left-fill.
604	INVALID DATA VALUE	The referenced data element must contain a valid data value when it is entered; blank is permissible on nonmandatory fields.
605	INVALID ARREST DATE	<p>Data Element 42 (Arrest Date) Each component of the date must be valid; that is, months must be 01 through 12, days must be 01 through 31, and year must include the century (i.e., 19xx, 20xx). In addition, days cannot exceed maximum for the month (e.g., June cannot have 31 days). The date cannot exceed the current date.</p> <p>The date cannot be later than that entered within the Month of Electronic submission and Year of Electronic submission fields on the data record. For example, if Month of Electronic submission and Year of Electronic submission are 06/1999, the arrest date cannot contain any date 07/01/1999 or later.</p>
606	ERROR-DUPLICATE VALUE = [value]	Data Element 46 (Arrestee Was Armed With) The referenced data element in error is one that contains multiple data values. When more than one code is entered, none can be duplicate codes.
607	ERROR-MUTUALLY EXCLUSIVE VALUE = [value]	Data Element 46 (Arrestee Was Armed With) can have multiple data values and was entered with multiple values. However, 01 = Unarmed cannot be entered with any other data value.
608	EXACT AGE MUST BE IN FIRST TWO POSITIONS	Data Element 47 (Age of Arrestee) contains data, but is not left-justified. A single two-character age must be in positions 1 through 2 of the field.
609	CONTAINS NONNUMERIC ENTRY	Data Element 47 (Age of Arrestee) contains more than two characters indicating a possible age-range is being attempted. If so, the field must contain a numeric entry of four digits.
610	FIRST AGE MUST BE LESS THAN SECOND FOR AGE RANGE	Data Element 47 (Age of Arrestee) was entered as an age-range. Accordingly, the first age component must be less than the second age.
615	CANNOT HAVE EMBEDDED BLANKS BETWEEN FIRST AND LAST NON-BLANK CHARACTERS	Must be blank right-fill if under 12 characters in length. Cannot have embedded blanks between the first and last characters entered.

Arrestee Segment Errors		
Error Number	Error Message	Error Description
616	MUST BE LEFT-JUSTIFIED-BLANK DETECTED IN FIRST POSITION	Data Element 2 (Incident Number) and Data Element 41 (Arrest Transaction Number) must be left justified with blank right-fill when less than 12 characters in length.
617	CANNOT HAVE CHARACTERS OTHER THAN A-Z, 0-9, HYPHENS, AND/OR BLANKS	<p>Data Element 2 (Incident Number) Must contain a valid character combination of the following:</p> <ul style="list-style-type: none"> <li>• A–Z (capital letters only)</li> <li>• 0–9</li> <li>• Hyphen</li> </ul> <p>Example: 11-123-SC is valid, but 11+123*SC is not valid.</p>
618	ARREST DATE CANNOT BE ON OR AFTER THE INACTIVE DATE OF THE ORI	Data Element 42 (Arrest Date) The UCR Program has determined that an ORI will no longer be submitting data to the FBI as of an inactive date. The FBI will not accept arrest data from this ORI after this date.
622	AGE RANGE CANNOT HAVE 00 IN FIRST TWO POSITIONS	Data Element 47 (Age of Arrestee) was entered as an age-range. Therefore, the first age component cannot be 00 = Unknown.
652	DISPOSITION MUST BE ENTERED WHEN AGE IS LESS THAN 18	Data Element 52 (Disposition of Arrestee Under 18) was not entered, but Data Element 47 (Age of Arrestee) is under 18. Whenever an arrestee's age indicates a juvenile, the agency must enter the disposition..
653	FOR AGE GREATER THAN 17 DISPOSITION SHOULD NOT BE ENTERED	Data Element 52 (Disposition of Arrestee Under 18) was entered, but Data Element 47 (Age of Arrestee) is 18 or greater. Whenever an arrestee's age indicates an adult, the agency cannot enter the juvenile disposition because it does not apply.
654	AUTOMATIC INDICATOR MUST BE BLANK OR A	Data Element 46 (Arrestee Was Armed With) does not have A = Automatic or a blank in the third position of field.
655	WEAPON TYPE MUST = 11, 12, 13, 14, OR 15 FOR AN A IN THE AUTO INDICATOR	<p>In Data Element 46 (Arrestee Was Armed With), A = Automatic is the third character of code. It is valid only with codes:</p> <p>11 = Firearm (Type Not Stated)  12 = Handgun  13 = Rifle  14 = Shotgun  15 = Other Firearm</p> <p>A weapon code other than those mentioned was entered with the automatic indicator. An automatic weapon is, by definition, a firearm.</p>

Arrestee Segment Errors		
Error Number	Error Message	Error Description
656	THIS ARRESTEE EXCEEDED THE NUMBER OF OFFENDERS ON THE GROUP A INCIDENT	<p>A Group A Incident Report was submitted with more arrestees than offenders. The number (nn) of offenders is shown within the message. The incident must be resubmitted with additional Offender Segments. This message will also occur if an arrestee was submitted and Data Element 36 (Offender Sequence Number) was 00 = Unknown.</p> <p>The exception to this rule is when an additional arrest is reported for a pre-NIBRS incident. In this case, Segment Level 6 (Arrestee Segment) will contain A = Add, but the data value in Data Element 2 (Incident Number) will not match an incident already on file in the national UCR database. The segment will be processed but used only for SRS purposes and will not be included in the agency's NIBRS figures.</p>
661	ARRESTEE SEQUENCE NUMBER ALREADY EXISTS	<p>Segment Level 6 (Arrestee Segment) cannot contain duplicate data values in Data Element 40 (Arrestee Sequence Number) when two or more Arrestee Segments are submitted for the same incident. Data Element 41 (Arrest Transaction Number) is the number assigned by the reporting agency to an arrest report to identify it uniquely. If multiple arrestees are reported, each having the same data value in Data Element 40 (Arrestee Sequence Number), ensure that Data Element (Arrest Transaction) is unique for each arrestee submitted to ensure that duplication does not occur.</p>
664	ARRESTEE AGE MUST BE NUMERIC DIGITS	<p>Data Element 47 (Age of Arrestee) does not contain a numeric entry of 00 through 99 for an exact age.</p>
665	ARREST DATE CANNOT BE BEFORE THE INCIDENT START DATE	<p>Data Element 42 (Arrest Date) cannot be earlier than Data Element 3 (Incident Date/Hour). A person cannot be arrested before the incident occurred.</p> <p>The exception to this rule is when an additional arrest is reported for a pre-NIBRS incident. In this case, Segment Level 6 (Arrestee Segment) will contain I = Incident Report, but the data value in Data Element 2 (Incident Number) will not match an incident already on file in the national UCR database. The segment will be processed, but used only for SRS purposes and will not be included in the agency's NIBRS figures.</p>
667	INVALID ARRESTEE SEX VALUE	<p>Data Element 48 (Sex of Arrestee) does not contain a valid code of M = Male or F = Female. <b>Note:</b> U = Unknown (if entered) is not a valid sex for an arrestee.</p>

Arrestee Segment Errors		
Error Number	Error Message	Error Description
669	NO ARRESTEE RECORDS ALLOWED FOR A JUSTIFIABLE HOMICIDE	Group A Incident Reports cannot have arrests when Data Element 6 (UCR Offense Code) is 09C = Justifiable Homicide. By definition a justifiable homicide never involves an arrest of the offender (the person who committed the justifiable homicide).
670	JUSTIFIABLE HOMICIDE CANNOT BE AN ARREST OFFENSE CODE	Data Element 45 (UCR Arrest Offense Code) was entered with 09C = Justifiable Homicide. This is not a valid arrest offense.

Group B Arrest Report Segment Errors		
Error Number	Error Message	Error Description
751	ARRESTEE SEQUENCE NUMBER ALREADY EXISTS	<p>(Group B Arrest Report Segment) When a Group B Arrest Report (Level 7) has two or more arrestees, the individual segments comprising the report cannot contain duplicates. In this case, two arrestee segments were submitted having the same entry in Data Element 40 (Arrestee Sequence Number). Error should only be thrown when the action type is A = Add.</p> <p>The Data Element 41 (Arrest Transaction Number) is the number assigned by the reporting agency to an arrest report to identify it uniquely. If multiple arrestees are reported, each having the same data value in Data Element 40 (Arrestee Sequence Number), ensure that Data Element 41 (Arrest Transaction Number) is unique for each arrestee submitted to ensure that duplication does not occur.</p>
752	DISPOSITION MUST BE ENTERED WHEN AGE IS LESS THAN 18	Data Element 52 (Disposition of Juvenile) was not entered, but Data Element 47 (Age of Arrestee) is under 18. Whenever an arrestee's age indicates a juvenile, the agency must enter a disposition.
753	FOR AGE GREATER THAN 17 DISPOSITION SHOULD NOT BE ENTERED	Data Element 52 (Disposition of Juvenile) was entered, but Data Element 47 (Age of Arrestee) is 18 or greater. Whenever an arrestee's age indicates an adult, the agency cannot enter the juvenile disposition because it does not apply.
754	AUTOMATIC INDICATOR MUST BE BLANK OR A	Data Element 46 (Arrestee Was Armed With) does not have A = Automatic or a blank in the third position of field.
755	WEAPON TYPE MUST = 11, 12, 13, 14, OR 15 FOR AN A IN THE AUTO INDICATOR	<p>If Data Element 46 (Arrestee Was Armed With) weapon is an Automatic, add A as the third character of code; valid only with codes of:</p> <ul style="list-style-type: none"> <li>11 = Firearm (Type Not Stated)</li> <li>12 = Handgun</li> <li>13 = Rifle</li> <li>14 = Shotgun</li> <li>15 = Other Firearm</li> </ul> <p>A weapon code other than those mentioned was entered with the automatic indicator. An automatic weapon is, by definition, a firearm.</p>
757	ARRESTEE AGE MUST BE NUMERIC DIGITS	Data Element 47 (Age of Arrestee) does not contain a numeric entry of 00 through 99 for an exact age.

Group B Arrest Report Segment Errors		
Error Number	Error Message	Error Description
758	INVALID ARRESTEE SEX VALUE	Data Element 48 (Sex of Arrestee) does not contain a valid code of M = Male or F = Female. <b>Note:</b> that U = Unknown (if entered) is not a valid sex for an arrestee.
759	DUPLICATE GROUP B ARREST REPORT SEGMENT ON FILE	The Group B Arrest Report (Level 7) submitted as an A = Add is currently active in the FBI's database; therefore, it was rejected. If multiple arrestees are involved in the incident, ensure that Data Element 40 (Arrestee Sequence Number) is unique for each Arrestee Segment submitted so that duplication does not occur.
760	LEVEL 7 ARRESTS MUST HAVE A GROUP B OFFENSE	Group B Arrest Reports (Level 7) must contain a Group B Offense Code in Data Element 45 (UCR Arrest Offense). The offense code submitted is not a Group B offense code.

Additionally, adjustments to previously submitted data from an agency now in Covered-by Status will be processed and no error generated.

### 5.3 Data Quality Checks (Warnings)

The FBI's UCR Program performs a series of data quality checks on the information that is provided by the state UCR programs. Unlike an error, which stops the data from entering the database completely, data quality checks are processed on data that has been accepted into the system. In most cases, these checks are automated processes that look for data submissions that are outside of the normal reporting parameters. This does not mean that the data is incorrect; it simply means the data requires further analysis to ensure the information provided was accurate. The table below addresses the warning number and descriptions of the data quality checks that are currently automated. The FBI's UCR Program will be adding more data quality checks to this table over time.

Virginia's Program mirrors this series of data quality checks. All warnings in the Virginia Beyond 2020 Repository contain the prefix DQ to indicate a potential data quality issue.

Warning Number	Warning Message	Description
1197	DELETED MULTIPLE INCIDENTS	A delete record was submitted but the incident number matched more than one incident number for that agency in our database. Multiple incidents were totally removed from the database if no replacement incident was submitted on the current file. If the incident number in question had a replacement incident following the deletion record on the current file, then multiple incidents were removed and replaced with that incident.

The participant is asked to check to see if the value entered was a data entry error, or if it was intended to be entered. A warning message is always produced when the value is \$1,000,000 or greater. For example, if the value of a property is \$12,000.99 but is inadvertently entered as \$1,200,099 in the computer record sent to the FBI, the FBI will generate a warning message. ## Appendix B: SUMMARY OF FEDERAL OFFENSE CODES

---

The changes to the NIBRS includes an additional Data Element 1A (Federal Judicial District) and additional offenses, reported by federal and tribal LEAs only, listed in the Group A (A.1) and Group B (A.2) tables. Other changes include removing segment specific language that referred to flat file details and modifying error messages, warnings messages, and data element edits to reflect the same. Also, in the “Types of NIBRS Report” section of the *2023.0 NIBRS XML Developer’s Guide*, details of the XML structure of a NIBRS submission are visually shown in figures.

**DOES NOT APPLY TO VIRGINIA AGENCIES**

## Appendix C: PRE-NIBRS INCIDENTS

---

The NIBRS start date is established when the first NIBRS incident is received for an agency by the UCR system. The start date for an agency will be established by the submission of a Group B Arrest or Zero Report to the UCR system. Regardless of the day within the month, the NIBRS start date will reflect the month and year of the incident, Group B Arrest, or Zero Report. For example, a submission is received from Texas. In this submission, there is an incident for an agency within Example City, TX, with the following ORI (TX0180000). The incident date within the NIBRS record is March 3, 2018, and represents the first NIBRS incident the FBI UCR Program ever received for Example City, TX. The NIBRS start date for Example City, TX, will be 03/2018 and the system will automatically generate this date and reference it for the purpose of handling pre-NIBRS Incidents and Window Records in future submissions.

Once the NIBRS start date is established, the NIBRS reporting flag will be set within the UCR system. The UCR system will automatically flip the reporting flag when the agency is associated to a State Agency Identifier (SAI) that has a NIBRS certification date. The NIBRS start date **cannot** be set prior to the NIBRS certification date.

If a complete NIBRS incident is received for Example City, TX, that is before the NIBRS start date, the system will accept the incident into the database as a pre-NIBRS Incident. The FBI UCR Program will only count arrest, clearance, or recovered property for each pre-NIBRS Incident within a submission. The counts obtained from the three data elements will only be used during a current reporting year. If the complete incident is outside of the current reporting year, the data will be stored, but ignored for all publication purposes. To clarify the term current reporting year, the FBI UCR Program establishes the timeframe in which crime data is accepted for annual publication. This timeframe is a general reference to accept annual crime data past the calendar year. In practice, the *2018 Crime in the United States* publication is sourced by submissions from January 2018 to May 2019 to construct the tables within the publication.

Therefore, it is imperative the federal/state UCR programs and FBI UCR Program work closely to determine the correct NIBRS start dates for each agency to avoid confusion and duplication of count. As a safeguard against duplication, the UCR system will count SRS data in the unlikely event NIBRS data was reported for the same month.

The following statements for the stated policy:

- If a NIBRS agency submits SRS data that is dated prior to the NIBRS start date, the system will accept the data.
- If a NIBRS agency submits SRS data that is dated after the NIBRS start date, the system will automatically reject the data.
- If Example City, TX, has a NIBRS start date of June 2019 and a complete NIBRS incident is submitted with an arrest date of May 30, 2019, this incident will not be used for arrests, clearances, and/or property recovery in that the agency was not NIBRS certified until June 2019. This data should be submitted via SRS.
- If Example City, TX, reports a homicide in December 2018 via SRS submission and has a NIBRS start date of January 2019 and a complete NIBRS incident is submitted with an arrest date of January 31, 2019. The arrest data will be applied to 2019 reporting and the homicide offense within the complete January 31st NIBRS incident will **not** be counted.

## Appendix D: TIME-WINDOW SUBMISSIONS

---

Time Window is a fragment, or piece of an incident, used to update an existing incident that is outside of the two-year reporting window of the UCR program. This limitation is a result of the legacy UCR technical solution. The Window record can execute adds, modifies, or deletes. The segments that are allowed within a Window Record are: Administrative, Property, and Arrestee.

When a Window Record is received by the UCR system (both legacy and Tech Refresh), the added data does not append to an existing incident. The data is stored within an orphan table. The system does not, and will not, provide a notification to the contributor regarding status within the database. Simply due to the limitation of not appending or attaching to an incident. To confirm, the UCR Tech Refresh solution will execute the Window Record instruction in the same manner as the UCR legacy system up to December 31, 2020. Starting January 1, 2021, the FBI's UCR Program will use the pre-NIBRS policy to collect and report, when applicable, arrest, clearance, and recovered property.

***Error 159 – Positions 58-87 must be blank for Group A Incident Report***

***Administrative Segments submitted with a Segment Action Type that is not W = Time-Window Submission cannot have an entry in the Window UCR Offense Code Section.***

Given the structure of NIBRS, the W (Window) and D (Delete) both occupy the same position in the administrative segment. This makes it difficult to determine if a submitted delete is for a Window record or for an incident. When a delete is received that contains exceptional clearance codes, it is assumed, in legacy, to be a delete for the window record. In the new system, if a delete is received with exceptional clearance codes but there is no corresponding window record it will be ignored. If a matching window record is found in the orphan table, it will be deleted from the orphan table. If a delete is received without exceptional clearance codes, it is assumed to be a delete for an incident.

Please contact the UCR Program for further information regarding Time-Window Submissions.

**DOES NOT APPLY TO VIRGINIA AGENCIES**

## Appendix E: MANDATORIES

---

This section sets forth the requirements for reporting data elements to the FBI.

### A. Data Element Requirements

There are two sets of reporting requirements:

1. Group A Incident Report Data Elements - There are two subsets of these data elements:
  - Common Data Elements - These are data elements which are applicable to all Group A offenses.
  - Additional Data Elements - These are data elements that are also applicable to individual Group A offenses. They are in addition to the common data elements and complete the reporting requirements for Group A offenses.
2. Group B Arrest Report Data Elements - These data elements are applicable to arrests for Group B offenses. They are a subset of the data elements used for Group A offenses.

### B. Mandatory versus Optional Data Elements

Data elements designated as mandatory must have data values entered for them in data records submitted to the FBI, or the reports to which they relate will be rejected as containing errors. Examples of mandatory data elements are ORI, Incident Number, and Incident Date/Hour. If an incident report submitted on the electronic submission lacks entries for the ORI Number, Incident Number, or Incident Date/Hour, the report will be rejected. Some mandatory data elements require a condition to arise before they must have data entered.

They have an If statement associated with them stating the condition to be fulfilled which will require their presence.

- Example: If Cleared Exceptionally does not = Not Applicable  
Exceptional Clearance Date = Date of the clearance

This means that if any code but N = Not Applicable was entered into Data Element 4 (Cleared Exceptionally); the date of the clearance must be entered into Data Element 5 (Exceptional Clearance Date).

Data elements designated as optional may or may not have data values entered into them, at the option of the agency submitting the data records to the FBI. The lack of a data value will not cause the report to be rejected as an error. The five optional data elements are:

1. Data Element 29 (Ethnicity of Victim)
2. Data Element 30 (Resident Status of Victim)
3. Data Element 50 (Ethnicity of Arrestee)
4. Data Element 51 (Resident Status of Arrestee)
5. Data Element 39A (Ethnicity of Offender)

The following example shows that it is up to the submitting agency's discretion whether Victim Ethnicity (Data Element 29) and Victim Resident Status (Data Element 30) will be reported, but the age, race, and sex of the victim must be reported. However, in order to be reported, the victim must be an Individual or Law Enforcement Officer.

- If Type of Victim = Individual

Age of Victim  
Sex of Victim  
Race of Victim  
Ethnicity of Victim (*Optional*)  
Resident Status of Victim (*Optional*)

### C. Required Data Values

In some instances, one or more data values appear within parentheses immediately following a data element assigned to an offense. This means that those data values are required in the sections (i.e., Property, Victim, etc.) submitted to the FBI for that offense, and if other data values are entered, the FBI's computer will reject the report as containing an error.

**Note:** When more than one offense is involved in an incident, there can be different data value requirements for the segments relating to them.

**Example 1:** For all Crimes Against Persons (Assault Offenses, Homicide Offenses, etc.), Type of Victim (I) or (L) means that the submitting agency must enter I = Individual or L = Law Enforcement Officer into Data Element 25 (Type of Victim) of the Victims relating to those offenses. If any other type of victim code is entered into the victim submitted for one of these offenses (B = Business or S = Society/Public), the FBI's computer will reject the report as containing an error.

**Example 2:** For all Crimes Against Society (Drug/Narcotic Offenses, Gambling Offenses, etc.), Type of Victim (S) means that the submitting agency must enter S = Society/Public into Data Element 25 (Type of Victim) of the Victims relating to those offenses. If any other type of victim code is entered into the Victim submitted for one of these offenses (I = Individual or B = Business), the FBI's computer will reject the report as containing an error.

**Example 3:** If both a Crime Against Person and a Crime Against Society were involved in the same incident, I = Individual should be entered into the victim for the Crime Against Person, and S = Society/Public should be entered into the victim for the Crime Against Society.

**Example 4:** The following example shows that if the offense (e.g., arson) was only attempted (no fire resulted), then the type of property loss/etc. designated within the quotation marks must be either None or Unknown.

- If Offense Attempted/Completed = Attempted  
Type Property Loss = None or Unknown

**Example 5:** The following example shows if the offense (e.g., arson) is completed, then a Property must be submitted which has the type of property loss/etc. designated within the quotations (Burned) entered into Data Element 14 (Type of Property Loss), provide Data Element 15 (Property Description), and provided Data Element 16 (Value of Property). If any other type of property loss/etc. was entered by the submitting agency (e.g., None, Counterfeited, Destroyed/Damaged/Vandalized, Stolen, etc.), the FBI's computer will reject the report as containing an error.

**Note:** In a multiple-offense incident, other Crimes Against Property may be involved which could call for the other types of property loss/etc. For example, if a single incident involved

both arson and burglary, then a Property containing burned and another property containing stolen could be submitted for the incident.

- If Offense Attempted/Completed = Completed  
Type Property Loss = Burned  
Property Description  
Value of Property

**Example 6:** The following example shows if an Offender Sequence Number was assigned data were entered describing a subject), then victim-to-offender association data must be entered Data Element 34 (Offender Numbers to be Related) and subject-to-victim relationship data must also be present Data Element 35 (Relationships of Victim to Offenders).

- If Offender Sequence Number does not = Unknown  
Offender Number to be Related  
Relationship of Victim to Offender
