

	DWI Detection & SFST Instructor Development Course
Session 10 – Guidelines for Conducting Video Workshops for SFST Training	
  	February, 2017

Session 10: Guidelines for Conducting Video Workshops for SFST Training

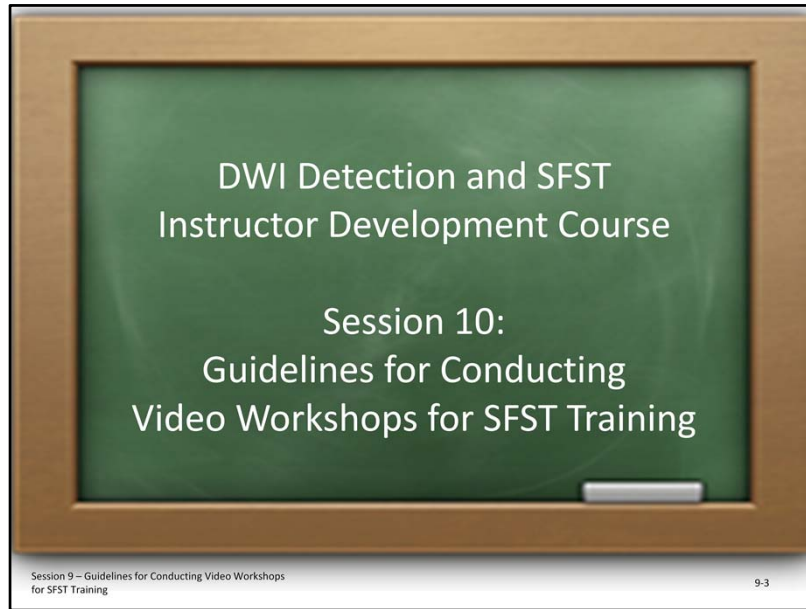

Estimated time for Session 10: 1 Hour (depending on class size)

Session Objectives

- Discuss the use of NHTSA/IACP videos of drinking subjects in SFST Training
- Coordinate the presentation of the NHTSA/IACP videos to provide for an efficient and effective learning experience
- Describe the two options for SFST Training
- Describe the maintenance and use of the SFST Log

Contents

- A. Overview
- B. Procedures for Using Videos
- C. Use and Maintenance of the SFST Log
- D. Questions and/or Concerns

Session Objectives

- Discuss NHTSA/IACP videos of drinking subjects
- Coordinate video presentations
- Describe two options for SFST Training
- Describe maintenance and use of the SFST Log

Session 9 – Guidelines for Conducting Video Workshops
for SFST Training

9-4

Session Objectives

At the conclusion of this session, participants should be able to:

- Discuss the use of NHTSA/IACP videos of drinking subjects in SFST Training
- Coordinate the presentation of the NHTSA/IACP videos to provide for an efficient and effective learning experience
- Describe the two options for SFST Training
- Describe the maintenance and use of the SFST Log

A. OVERVIEW

A live alcohol workshop is strongly recommended by NHTSA/IACP. The use of video-drinking subjects is an optional training method. The SFST course allows two video options in the core curriculum.

Video Option One is to use NHTSA/IACP-approved videos of drinking subjects used in **SESSION 11-A, "TESTING SUBJECTS PRACTICE: FIRST SESSION" ONLY**. This option will include a live alcohol workshop in Session 14.

Video Option Two uses NHTSA/IACP-approved videos of drinking subjects in **SESSION 11-A, "TESTING SUBJECTS PRACTICE: FIRST SESSION, AND IN SESSION 14-A, "TESTING SUBJECTS PRACTICE: SECOND SESSION.**

Procedures for Using Video

B. PROCEDURES FOR USING VIDEOS

When using the videos in your course, divide the class into two groups. Participants should work in the same groups formed for the Dry Run Practice Session. The instructor should distribute video score sheets and have participants fill in their name.

Advise participants each subject will be viewed performing all three tests. Brief pauses occur between each test to allow participants time to record observed clues. Advise participants two views of the subject performing the Walk and Turn are also provided. The first is an overall view of both stages and the second is a close-up of the subject's feet while walking.

It is recommended half the class practice the SFSTs under the direction of classroom instructors while the remainder of the class views, records, and interprets the NHTSA/IACP-approved videos for this session. Once completed, the groups switch roles. Only one instructor is needed to direct the viewing of the videos.

If time permits, participants will administer additional tests to each other. Participants will report their observations of video subjects at the end of the session. The instructors will notify participants of the video subjects' BACs.

SFST Log

Session 9 – Guidelines for Conducting Video Workshops
for SFST Training

9-7

C. USE AND MAINTENANCE OF THE SFST LOG

The SFST Log is used to record the results of the SFSTs performed on suspected impaired subjects. This log is extremely important in documenting an officer's experience and proficiency in performing and interpreting SFSTs.

This log has the following components:

- The date the SFSTs were administered
- Subject's full name
- Results of each SFST test
- Classification of BAC as above or below 0.08 BAC
- Arrest/Not Arrest
- Subject's measured BAC (if available)
- Remarks

Utilization of the SFST Log

NHTSA and IACP strongly recommend each officer continue to document all administrations of SFSTs throughout their DWI enforcement career. The documentation will include subject's name, date, results of each test, and the officer's classification of subject's BAC and measured BAC, if available. A sample log is included.

Questions and/or Concerns
